OUR MILITARY TERMS WITH THE REBELS.

THIRTY-SEVEN persons are said to have been indicted for treason in the United States District Court sitting at Norfolk, Virginia. In the list occur the names of the following general officers of the late Confederate army:—R. E. LEE, COOPER, EWELL, LONGSTREET, EARLY, HAMPTON, MAHONE, FITZHUGH LEE, G. W. C. LEE, W. H. F. LEE, WISE, and CORSE. Hardly two months before that indictment was framed, these officers capitulated to Lieutenant-General GRANT and Major-General SHERMAN, on the express agreement of those commanders—an agreement never disavowed by their Government unto this day—that “each officer and man will be allowed to return to their homes, not to be disturbed by United States authority so long as they observe their parole and the laws in force where they may reside.” On what rightful authority are the above-named officers selected from an agreement which embraced “every officer and man,” after they had returned to their homes according to the stipulation? It is not pretended that they have broken their parole, or the laws in force where they reside. Upon what principle of justice or of honor do we violate our pledge to them? The answer must involve the whole subject of the binding force of GRANT’S treaty with LEE. For ourselves, we believe law and reason will show as clearly as the instincts of conscience and of honor that our Government is bound by the treaty of Appomattox Court-House, and will continue to be so in time of peace as well as in time of war. The following are our reasons:

I. *The Contract.* General GRANT’S stipulation with General LEE was a compact and a contract, in which each party gave up something which the other desired. There was a *quid pro quo*. On the very face of the agreement, and in the very words we have quoted, there is an obvious legal consideration expressed. The very fact that an army will surrender, will turn over its arms, equipments, and material of every kind, will disperse, will observe its parole, and will, as citizens, observe the laws in force where they reside, furnishes consideration for a good and binding agreement in return, from the victors, for amnesty to all. It can be proved, moreover (though it is not necessary), that President LINCOLN, the ultimate authority on the amnesty question, was disposed to give the enemy just such terms as GRANT gave, for the sake of ending the war. And even Secretary STANTON himself, according to the unimpeachable testimony of General SHERMAN, intimated to the latter at Savannah that some concessions would be made for the sake of a speedier end of the war. In a word, the enormous expenses of the war, the weariness of the people, the dangers of delay, and each day’s expenditure of priceless lives, called for an end of hostilities at the earliest moment. Now, in that one word “surrender”—the mere laying down of arms, without any promise of observing the parole or of future good conduct—was contained the relief from all

these burdens. Was it not consideration enough to make the contract binding on us who have already reaped these benefits?

In the surrender in question there was a special reason for giving terms as generous as GRANT gave, and which makes it clear that we had our *quid pro quo*. LEE’S surrender was felt to be the entering wedge to rive the stubborn Confederacy; and so it proved. It directly forced the capitulation of the three other great armies, without the exchange of a shot, and of every armed Rebel from Virginia to Texas. The magnanimous terms granted to LEE alone produced this result. To effect so inestimable an issue—a thing unparalleled in history—it was well to make great sacrifices. Humanity, as well as expediency, mere financial economy, as well as humanity, urged on that consummation. And even if it had been designed to exact stricter terms from JOHNSTON, for example, than from LEE, from TAYLOR and KIRBY SMITH than from JOHNSTON, yet military policy would have dictated this seduction of LEE’S army from the rest—a bribery, if you choose to call it so—by the offer of terms unexpectedly magnanimous. On either, or any ground, there was to the mind of any fair jurist, of any unprejudiced man, a consideration received by us which binds us to render the promised equivalent.

So much appears on the face of the stipulation—at the threshold of the argument. But the same point is put beyond all possible cavil when we examine the context of mighty events woven around the agreement at Appomattox Court-House. We refrain from historical rehearsal, for want of space. Enough to say, that, after the tremendous series of battles from Fort Stedman to Sailor’s Creek, our superiority had become certain and overwhelming. And yet, in the view of General GRANT, it was cruelty to drive his army of heroes, bleeding, worn, and exhausted, from continuous battle and chase, to idle butchery of its brave antagonist, bleeding and spent as well, but resolute to the last, when these concessions which GRANT was willing to make would certainly be followed by surrender. Had not the magnanimity which a gallant soldier feels for a brave adversary been motive sufficient, common gratitude to his own troops, and a decent regard for humanity, which some bloodthirsty gentlemen who have never trod a battle-field do not seem to possess, would justify him in giving the broad amnesty he did give—“to each officer and man.”

II. *Acceptance by the Government.* It is urged, however, that GRANT had no right to make anything but “military agreements” with the enemy. This is an exceedingly loose statement, but the meaning being obvious, we need not quibble upon words. It is as clear, at all events, as some of the phrases in the agreement of Appomattox Court-House. The objection admits that GRANT did actually make, whether rightfully or wrongfully, agreements applying to times of peace—agreements which would protect “each officer and man from disturbance by United States authority.” It will probably be admitted, even by the most dexterous quibblers, that being hanged by the neck for treason is a state of disturbance. Accordingly it will be admitted that GRANT pledged to the officers and men of LEE’S Army, whether properly or improperly, the protection of the Nation against a trial for treason. People declare that GRANT had no right to make such a pledge with much assurance; but we don’t know upon what, except assurance, the indignant assertion rests. The mere fact that a man is entitled Lieutenant-General, and has a million of

men at his beck, to turn his requests into commands, does not deprive him of power conceded to a plain civilian. JOHN SMITH, duly authorized, could have made a binding agreement for all times—for times of peace as well as of war—and why not General GRANT? Whether the latter was as capable, or as shrewd, or as accurate, or as clear-headed a man for that purpose as another, as Mr. SEWARD, for example, is a different question. All that is wanting to prove is that the Government accepted his acts as its agent, and aided him to carry out the contract he had made as its agent. That proved, will bind the Government; if it does not, what would?

Four direct ratifications of that contract, by our Government, with numberless cumulative proofs of ratification, stand already recorded in history. The first took place on the 9th day of April, at Appomattox Court-House, in the surrender of LEE to GRANT; the second at Durham Station, in the surrender of JOHNSTON to SHERMAN; the third at Citronelle, in the surrender of TAYLOR to CANBY; the fourth at New Orleans, and subsequently, formally at Galveston, in the surrender of KIRBY SMITH to CANBY. Many surrenders of local or irregular and unattached commands have also been made on the same terms. Will any man in his senses pretend that, with such intervals and lapses, the Government did not accept any of the treaties? For if we reject GRANT’S, we must reject all the rest, since they are all substantially the same on the point of granting amnesty and future immunity to each “officer and man.” This is enough, but it is not all. The Government has never uttered one word of criticism or complaint against GRANT’S terms from the 9th day of April to this 1st day of July. Having the power to exact harsher terms, it has clung to them, and reinforced them by direct instructions, on three separate and successive occasions. The Secretary of War has bulletined the news of the various surrenders, and their terms, through the country, announcing that the terms had been agreed upon, and thus giving official approval. Government aid has been lent to carrying out these terms. The order for reducing the Armies was issued on the news of LEE’S surrender. The Armies have been disbanded on the faith of the other surrenders. In a word, all the relations of Government, with the South, with foreign nations, with the loyal people, were based on the approval of GRANT’S terms.

But, as if to put beyond all dispute its assent to GRANT’S terms, the Government expressly submitted them to its Attorney-General, Mr. SPEED, for judicial criticism. He pronounced an opinion upon one point—against the right of soldiers who had joined LEE’S army from loyal States “to return to their homes,” according to GRANT’S agreement. Here, then, was an express rejection or modification of GRANT’S terms in one particular. But there was no modification in any other. Admitting that the Government was authorized to take the steps which Mr. SPEED advised, it is more apparent than ever how its failure to reject or modify any other of GRANT’S stipulations showed its approval of the rest. On three distinct occasions of subsequent surrender the Government did cause Mr. SPEED’S amendment to be inserted in the respective treaties, in formal words. In an article written by us last week, we gave the whole history of these different surrenders, and pointed out the parts in which they varied, for the express purpose of leading up to the inference we now draw, viz: that Government deliberately left unaltered, when it had both the moral right and

physical power to alter it, the provision pledging future immunity to "each officer and man" of the surrendered armies. In the case of KIRBY SMITH's surrender, General CANBY even went so far as to mention in his terms the PRESIDENT'S Amnesty Proclamation in its relation to the "homes in loyal States," but it was not introduced into the provision for future immunity.

Again, GRANT obviously made a "civil agreement," quite as essentially as SHERMAN did. The Government disavowed SHERMAN's, and caused GRANT's to be substituted in a Cabinet meeting at which, according to Mr. STANTON, every member of the Cabinet, and the PRESIDENT and Lieutenant-General themselves were present. Will any man say, after this meeting, called for such a purpose, that GRANT did not get the express sanction, not only of the old Administration, but of the new? The very fact of substituting GRANT's agreement for SHERMAN's settles the question. We criticize the elaborate historical precedents cited by correspondents of the JOURNAL to show how our Government might have refused to abide by the terms given to LEE, in one word—it did not so refuse.

III. *The Interpretation of the Terms.* There can be no doubt in the mind of any fair man as to what the famous words promising future immunity, really signify. The argument to show that we need not accept the terms shows an appreciation of their meaning. But even if there were doubt, magnanimity would prevent us from distorting words now, when we would not have done so before the Rebels laid down their only means of defence. Reason, and law as well, declare that the terms shall weigh most strongly against those that give them. It was we who were the victors, making our own propositions. They emanated from us. We could have made them clearer or stricter if we chose. It certainly is not for us to twist out of our own terms the only benefit that make them worthy of consideration.

In the case of every army besides LEE's, it is unquestionable that they all surrendered on the faith of the acceptance of the terms granted to LEE—from the fact that the amnesty promised by GRANT was neither modified, nor explained; no exceptions were ever made by Government to that treaty including "each officer and man." Had the leaders suspected they would be tried for treason after immunity had been granted, would they not have preferred certain death on the field, to the risk of ignominious death on the scaffold? At all events, they would have escaped, as they could have done, had they dreamed of such subsequent proceedings. Let us not violate our pledges to the conquered, in the face of the world and of history.

We do not ask leniency to traitors; we would not too readily restore to the Rebels all their rights as citizens; we simply speak in the interest of the national honor which, whether wisely or not, has been solemnly pledged to the armies of the Rebellion.

THE Armies are still dispersing to their homes, and Washington is dull and deserted. The work of reduction goes on. That magnificent army of world-wide fame, the Army of the Potomac, will soon be dwindled to a shadow of its former self. It may already be said to have ceased to exist. Its headquarters, until lately on the Virginia side of the river, near the Long Bridge, are soon to be broken up. General MEADE is still superintending the mustering out of portions of his late Army. The Army of the James is undergoing the same depletion as the Army of the Potomac. Instructions have been issued from the War Department to reduce the Army of the Potomac to 16,000 effective men, to consist of three divisions of infantry. The following regiments will be mustered out, in accordance with this order:—

First Maine; Fifth New Hampshire; Fifth, Sixth, and Eighth Vermont; Thirty-second, Nineteenth, and Twenty-eighth Massachusetts; Ninety-first, Tenth, Thirty-ninth, Fortieth, Sixty-third, Seventy-third, Eighty-sixth, Sixty-ninth, Eighty-eighth, Ninety-third, Fifty-ninth, Fifty-second, Forty-ninth, Seventy-seventh, and Forty-third New York; First, Tenth, and Third New Jersey; One Hundred and Ninetieth, Eighty-eighth, Eighty-third, One Hundred and Ninety-first, Eleventh, Fifty-sixth, Ninety-ninth, One Hundred and Sixth, Sixty-ninth, Fifty-third, One Hundred and Tenth, Fifty-seventh, Eighty-first, Ninety-third, One Hundred and Third, Sixty-first, Ninety-eighth,

and Eighty-seventh Pennsylvania; First Maryland; Seventh West Virginia.

The muster-out will be by entire regimental or battalion organizations, including all additions, whether recruits or otherwise, and all absentees.

The Navy Department reports the final transfer of the Rebel forts and material of war in Texas to us. Our troops are concentrating near Brazos Santiago. A garrison has possession of Brownsville, where General BROWN captured seven hundred bales of cotton. Generals STEELE and WEITZEL are at Brazos Santiago, and a railroad will be opened between that point and Brownsville.

From Savannah it is reported that, on the 21st, some of the enlisted men of the One Hundred and Sixty-fifth New York Zouaves refused to do duty with the colored troops. It was at first reported that the whole regiment had mutinied, but this was incorrect. The matter was reported to Brevet Brigadier-General WOODFORD, commanding the post, who arrested forty-three mutineers. They were at once sent to Fort Pulaski.

MILITARY SCHOOLS OF THE WORLD.

THE extraordinary interest attending the present year's examination has awakened sundry comparisons between West Point and the military schools of Europe. It will be well for all of us to become more thoroughly acquainted with the opinion of cadet education abroad. We may not presume with our limited military and marine to outflank numerically the older and more extensively endowed establishments of the great continental powers; but the increase of army and navy will compel the enlargement of both the schools of West Point and Annapolis, and the work of revision should properly accompany that of extension.

The system of military education among the French is more thorough and more practical than anywhere in the world. The Polytechnic School and the School of St. Cyr stand at the head of military establishments. The former furnishes chiefly the scientific knowledge required in the higher fields of the military art; and since 1794, under the auspices of the empire, it has supplied the best artillerymen and engineers in Europe. Any boy in France not past twenty years of age may enrol himself for the examination, and the examiners pass through France, from province to province. The most meritorious applicants are invariably selected, and supported at their option by themselves or the State. Two years is the term of study, and at the end those highest on the list can choose the arm and battalion of the service they prefer; but it is not compulsory to enter the army. Besides its military staff, it has about forty professors, five boards of management, and ten of the first savans in the world to make yearly examinations of it. The cadets of the school in two revolutions have turned out gallantly on the popular side; and the downfall of the Bourbons is to be ascribed to them as much as to any other cause.

St. Cyr, established in 1863, lies beyond Versailles, twelve miles from Paris. Soldiers from the ranks can be admitted here upon examination, and a degree from the Lycee, or public school, is essential to an application for admission. When admitted, the cadets engage to serve France seven years. Therefore, if they fail to pass the examination at the close of the term of two years, they become common soldiers. The most accomplished graduates, at the end of their term of service, are sent to the Staff School at Paris. Mathematics is indifferently taught at St. Cyr, but the conditions of military legislation and administration, with actual manœuvre, and the practical works of the field, as building and laying pontoons, making fascines, profiles, saps, etc., are very strictly attended to. Sham campaigns are undertaken in the neighborhood of the school, and the instruction in the use of arms is most perfect.

At Metz, the pupils passing up from the Polytechnic School, with the rank of second lieutenant already gained, are allowed great freedom, and are entrusted with subordinated responsible duties, such as visiting and inspecting boundaries. They also are engaged in actual surveys, and the planning of works, are taught topography, geology, permanent fortification, reconnaissances, siege, and architecture.

In the French Staff School there are eighteen professors. The four English academies are:—Chatham, for engineers; Woolwich, and Sandhurst. The East India Company, which keeps up a military establishment of its own, has a school for cadets at Addiscombe. These schools are loosely conducted, admission to them being obtained by purchase or influence, and the preliminary examinations being almost superfluous. The academy at Woolwich stands at the end of a long parade-ground with a common behind it. It has been recently reported by a commission, at the head of which was the Duke of CAMBRIDGE, as far inferior to Continental schools.

The ponderous tactics in vogue throughout Germany were scarcely eradicated by the reverses of the French revolution, the Hungarian revolt, and the Italian war. The latter costly experiment, however, has led to the reorganization of the Austrian military system upon habits of more freedom. Her non-commissioned officers, to the number of six or seven thousand, are educated through the various military towns of the empire. Eight years are consumed in the tuition and disciplining of every cadet, and specially meritorious pupils from the twenty non-commissioned schools are transferred to the regular academies and given commissions. There are seven regular academies, four of which are primary, and receive the cadets when they have attained their eleventh year. The Artillery Academy contains two hundred pupils. These serve two years at school, are made second lieutenants, and depart to join their regiments; but those who pass two years in the field with special merit are recalled, and given excellent professional educations. The Austrian Engineer Academy has always held a very high rank. There are no finer fortifications in the world than those of this school at Alessandria and Verona. At Weimar Neustadt, the great school of the infantry and cavalry, four years' tuition are given, beginning at the cadet's sixteenth year. Four languages are taught, and the graduates are offered the choice of arms and equipments, in the order of their merit.

The Prussian cadets enter the higher military schools at about the same age with our West Pointers. Colonels of regiments, instead of Congressmen, select the cadets from ensigns and non-commissioned favorites. Only the French language is taught. The chief academy is at Berlin, though there are excellent schools at Stettin and Konigsberg. The Berlin Staff School furnishes all the staff officers in the kingdom, and contains forty members in each class, the classes being three, and the term of tuition three years. The staff cadets spend several months of the year in reconnoitring fortifications on the frontiers.

The artillery and engineer branches are taught at the same school in Prussia, and the cadets therein are not put immediately after appointment into the academy. On the contrary, they go into the ranks nine months, and afterwards pass three years of laborious civil and military study, varied by visits to the government foundries and fortresses. These visits are esteemed in Prussia, and indeed throughout Europe, of the highest efficacy. We do not adopt them at West Point. In the five Prussian cadet schools, sons of army officers are almost exclusively educated; and thus military rank is made hereditary. Only one-third of the cadets are given commissions, the rest being sent back to the ranks.

Russia has an experimental naval school on the Black Sea, and another on the Baltic. From these periodical cruises are taken, and they are taught by officers temporarily relieved from duty on board ship. In all the Russian schools, the study of the languages constitutes an important feature. The Russian officers who visited us two years ago were all excellent linguists, and in case of emergency could be transformed from soldiers to diplomats. The renowned SUWAROFF, probably the greatest military genius produced by Russia, spoke in seven tongues fluently. At St. Petersburg there are three military schools: others are distributed in the chief cities of the empire. The Staff School, where the term of tuition is two years, is composed of officers exclusively, and chiefly of young men of high civil rank, seldom more than thirty in number. A year elapses between the pupil's graduation and his appointment upon a general's staff. There are in the empire about thirty military colleges for the guards and line, accommodating upwards of eight thousand cadets. These are disciplined physically, but receive inferior education in the higher theoretical branches. The Engineer School is very carefully officered, and compares favorably with the best German schools. It contains a hundred and fifty pupils. The school for ensigns has two hundred students, and that for the artillery quite as many. There is a large corps, also, quartered in a permanent establishment for a part of the term of tuition. The Russian military establishments are among the most careful, as they are the most extensive, in the world. All the latest suggestions in arms, tactics, and discipline are jealously adopted and tested. But the very plentifulness of the schools of the CZAR is attended with difficulties. He has no single academy, like West Point, to acquaint his cadets with the whole theory of the military art; and for this reason Russia has produced few masters of grand strategy, but very accomplished officers in special departments.

There are naval academies abroad: for the French at Brest; for the Austrians at Trieste; for the Italians at Genoa; for the Prussians at Stettin. A resumé of the course of study at West Point enforces the conclusion that our Military Academy, for what it aims to be, is one of the most successful schools of the world. Its aim, however, is not so high as in the better-sustained academies of France. The school at Annapolis is probably unequalled by any similar institution in Europe. A late note upon this subject in one of the British quarterlies says (1864) that, "in

"the British Isles and on the continent of Europe, there are at present attending military academies thirty thousand young men."

RECENT FOREIGN MILITARY PUBLICATIONS.

HAUPTMANN VON PLONNIES, acknowledged to be one of the first military writers of Germany, has recently followed up his admirable work on modern fire-arms with a very interesting and instructive monogram on the needle-rifle, used in the Prussian service. Though especially designed for Prussia, where the contest between muzzle-loaders and breech-loaders is hotly waged, it has a universal application, and, as the work of an eminent authority, should be extensively read in other countries. A brief summary of its contents will best exhibit its varied excellencies. In the first chapter, the author treats generally of the relation of breech-loading rifles to modern infantry tactics, and the necessities of modern warfare. Chapter second gives us a very full and exceedingly interesting sketch of the needle-rifle, and the alterations and improvements it has undergone since the invention of the smooth-bore needle-rifle in 1825. We learn from the third chapter, which treats of the present armament of the Prussian and Federal armies, that since 1857 the Prussian Regulars, and since 1859 the "landwehr," or militia, have been furnished with breech-loading needle-rifles, and that the number of these weapons at present on hand is about 600,000 pieces. The Northern Federal army contains 40,000 men, who are furnished with these rifles. The fourth chapter is the most important portion of the book. It contains a full and comprehensible detailed description of the needle-rifle, with numerous illustrations. The strong points of the rifle are contrasted clearly with its deficiencies; and the necessity of several improvements made evident.

One of the decided advantages possessed by the needle-rifle is great simplicity of construction. No other rifle, it is supposed, can be so readily and cheaply repaired. On this point HAUPTMANN VON PLONNIES obviously lays great stress. The necessity for repairing the needle-rifle, he says, is reduced to a minimum by simplicity of construction, and even the deficiencies and weak points, which are admitted, are obviated in a great measure by the careful drill in handling to which the Prussian soldiers are subjected. Even should a large proportion be disabled in the course of a battle, the extraordinary rapidity of fire of which this weapon is capable, would be sufficient to avert disaster.

The efficiency and success of our Sanitary Commission, during the late war, in alleviating the sufferings of sick and wounded soldiers, have awakened the attention of Europe to the deficiencies of their present arrangements for military field hospitals; and marked improvements have recently been introduced in the French and German systems. We have before us a little work by Dr. ERNST ANTON QUITZMANN, on Sanitary arrangements, and the transportation of sick and wounded soldiers, which gives the results of a thoroughly scientific investigation of the subject, and of an inspection of the military hospitals of Germany. It appears from this survey, that the sanitary system of Austria, which worked so wretchedly in the Italian war of 1859, and but little better in the war against Denmark, is the model followed by all the German states excepting Prussia. The author suggests a variety of reforms, some of which have been carried into effect.

GENERAL G. H. DUFOUR has prepared an elegant and very accurate military map of Switzerland, published by the government of that sturdy little republic.

MAJOR-GENERAL JOHN MITCHELL'S "Biographies of Eminent Soldiers of the Last Four Centuries," is a work of much general interest. Written by a soldier of long, varied and distinguished service, it possesses a peculiar value for military readers. The author judges soldiers, campaigns, battles and sieges with the judgment of an experienced soldier. In addition to this, he writes with great brilliancy, fluency and enthusiasm. The work before us is devoted entirely to military men of the second rank, such as MASSENA, SUWAROFF, the Chevalier BAYARD, Prince EUGENE and CHARLES XII., leaving NAPOLEON, WELLINGTON, and their peers untouched. MITCHELL, our readers may remember, was the author of an excellent work, entitled, "Thoughts on Tactics and Military Organization." His "Fall of Napoleon," published in 1845, attracted much attention, from its low estimate of NAPOLEON'S character and genius. The present work was the last and best which proceeded from his pen; and though included, as a matter of course, with English prejudice against foreign soldiers, it would be a valuable addition to the library of the military student.

The daily papers of Tuesday announce the arrest and imprisonment of W. D. MANN, Vice President and Superintendent of the United Service Petroleum Company, on the charge of having by false pretences defrauded the stockholders of that company of a large sum of money. The affidavits in the case allege that MANN, who was formerly

Colonel of the Seventh Michigan Cavalry, made use of his extensive acquaintance in the Army to procure subscriptions to the capital stock of the company from a number of prominent officers and gentlemen well known in military circles, and by a system of fraudulent representations, succeeded in inducing the company to purchase at a high price lands which he had obtained at a merely nominal figure. The officers of the company procured the arrest of MANN, and took measures to arrest also D. STRATTON, who is alleged to be implicated with him in his transactions. It is to be hoped that, if the charges are proven, they will succeed in recovering any amount fraudulently obtained from the company. As the name of Mr. W. C. CHURCH, of the ARMY AND NAVY JOURNAL, has appeared among the list of the officers of the United Service Company, it is proper that we should state that Mr. CHURCH resigned all official connection with the Company shortly after its organization, having with great reluctance and at the solicitation of friends interested in the company, temporarily accepted the position of Trustee and Treasurer. The position of Treasurer was resigned before the company was fully organized, and the duties of Treasurer were therefore never discharged by Mr. CHURCH.

The following extract from an unpublished letter of Mr. JEFFERSON to the grandfather of Admiral Du Pont, P. S. Du Pont de Nemours, contains an interesting reminiscence in regard to the appointment of young Du Pont to the Naval Academy, which was conferred by President MADISON on the 19th of December, 1815:

DECEMBER 31, 1815.

That your opinion of the hostile intentions of Great Britain towards us is correct, I am satisfied from her movements north and south of us, as well as from her temper. She feels the *glories* of her late golden achievements tarnished by our success against her by sea and land, and will not be content until she has wiped it off by triumphs over us also. I rely, however, upon the volcanic state of Europe to present other objects for her arms and her apprehensions, and am not without hope that we shall be permitted to proceed peaceably in rearing our children, and maturing and moulding our strength and resources. It is impossible that France should rest under her present oppression and humiliation; she will rise in gigantic strength, which cannot be annihilated, and will fatten her fields with the blood of her enemies. I only wish she may exercise patience until divisions among them may give her choice of sides. To the overwhelming power of England I see but two chances of limit. The first is her bankruptcy, which will deprive her of the golden instrument of all her successes. The other is that ascendancy which nature destines for us by immutable laws. But to hasten this last consummation we too must exercise patience and forbearance.

For twenty years to come, we should consider peace as the *summum bonum* of our country. At the end of that period we shall be twenty millions in number, and forty in energy, when encountering the starved and ricketty paupers and dwarfs of English workshops. By that time I hope your grandson will have become one of our high Admirals, and bear distinguished part in retorting the wrongs of both his countries on the most implacable and cruel of her enemies. In this hope, and because I love you, and all who are dear to you, I wrote to the PRESIDENT on the instant of reading your letter of the 7th, on the subject of his adoption into our Navy. I did it because I was gratified in doing it, while I knew it was unnecessary. The sincere respect and high estimation in which the PRESIDENT holds you is such, that there is no gratification within the regular exercise of his functions which he would withhold from you. Be assured, then, that if within that compass, the business is safe.

The able report "on the Military Statistics of the United States" prepared for, and published with the proceedings of the late International Statistical Congress, at Berlin, Prussia, by Mr. E. B. ELLIOTT, delegate to the Congress from the American Statistical Association, has already been noticed at length in our columns. This report, containing much valuable material, discussed with scientific care, has attracted the attention of scientific investigators on both sides of the Atlantic.

The following appropriate resolutions passed at the last meeting of the Association which Mr. ELLIOTT represented, lead us to hope that he will pursue his inquiries and make their results public:

On motion of Hon. Amasa Walker, it was
Voted, That thanks be presented to our learned and accomplished associate, E. B. Elliott, Esq., for the able manner in which he represented this association as its delegate to the International Statistical Congress at Berlin, of which we have abundant evidence in the valuable paper laid before that body by him on the "Military Statistics of the United States of America;" a printed copy of which has been presented to the association.

On motion of J. Wingate Thornton, Esq., it was
Voted, That Mr. Elliott be requested to prepare a Report of his observations in matters pertaining to the progress of Statistical Science in Europe, to be read before the Association at such time as he may choose.

The funeral of Rear-Admiral DuPont took place on Sunday last, at 1 P.M., at his residence near Wilmington. The services were held in the family chapel of the DuPont family, Bishop LEE, of Iowa, officiating, assisted by the Rev. Messrs. BRAKE and COLEMAN. The pall-bearers were, Major-General GEORGE G. MEADE; Commodore LARDNER, U.S.N.; Commander THOMAS TURNER, U.S.N.; Commodore ADAMS, U.S.N.; Surgeon JONATHAN FOLTZ, U.S.N.; Paymaster PETT, U.S.N.; who slowly accompanied the coffin to the grave, preceded by a battalion of United States marines—the only military escort.

FOREIGN MILITARY AND NAVAL MATTERS.

THE French Minister of War has decided that soldiers may be placed at the disposal of farmers in the absence of a sufficient number of hands to get in the crops.

A 600-pounder Blakely gun, the first of a new series, underwent the Government proof successfully on Wednesday last at Woolwich. The charges were 60 lb. The gun, being composed purely of steel, weighs only 14½ tons, or 7½ tons less than a wrought-iron gun of the same calibre.

GENERAL MILLINET has been elected Grand Master of the Grand Orient Freemason Lodges of France by one hundred and forty-two votes against thirty-six given to M. MASSOL. This office was rendered vacant by the death of Marshal MAGNAN. It appears that Marshal MAGNAN died in such pecuniary difficulties that, shortly before his last illness, he drew three years' pay in advance as grand huntsman of the court, and the diamonds of his military orders were found in the Mont de Pété.

THE *Research* has returned to Woolwich, after testing under sea-way Commander SCOTT'S iron gun-carriage and slide, which were worked with simple mechanical appliances by nine men, in competition with the proposed new pattern wooden carriage, worked by nineteen men. The old service pattern carriages, which are likewise of wood, were taken as the standard for comparison. After firing sixty rounds, the new pattern wooden carriage showed signs of weakness, and one of the service pattern became disabled, while Commander SCOTT'S carriage, which was worked with greater rapidity, and fired sixty-eight rounds, exhibiting no signs of weakness or defect.

On the 27th ult. another addition was made to the British iron-clad fleet, by the launch at Chatham of the wooden armor-plated frigate *Lord Warden*. Notwithstanding her enormous weight of armor, 1,400 tons, an effort has been made not to sacrifice the important element of speed, the stipulations of her designer being that she shall average at a trial speed fourteen knots per hour. Whether she will come up to his expectation or no, remains to be seen; but on one point there can be no doubt, that the *London* journal which said that the *Lord Warden* "will be perfectly impregnable to the existing ordnance of other nations, while she herself is capable of carrying the largest guns yet in use," wrote without much knowledge of the capacity of "the existing ordnance of other nations."

THE smoking of tobacco, notwithstanding the many treatises which have been written on the use and abuse of the "weed," is now so prevalent on board Her Majesty's ships, that the Lords of the Admiralty have thought proper to issue the following address:—"My Lords Commissioners of the Admiralty are pleased to make the following alteration in the regulations (Art. 82, page 343) respecting smoking on board ship: Smoking will henceforth be allowed on "on Sunday and Tuesday afternoons, until the "pipe to clear up decks," provided it does not interfere with the duties of the ship, or with the necessary drills in newly commissioned ships. And when "ships are in harbor the ordinary evening time for "smoking (which now begins at six P.M., after "quarters") will be extended till 9 P.M. No smoking "is ever to be allowed during divine service, or while "any duty is going on." One would think the last regulation unnecessary amongst civilized people.

A SERIOUS disaster has happened to the English frigate *President*, a drill-ship for the Royal Naval Reserve, lying in the city canal of the West India dock. In the course of last week shipwrights were engaged in caulking her, and the thirty-two 38-pound guns on the middle deck were sent forward, in order to get the stern more out of the water. The additional weight forward sprung a leak in her, and the fact of the ship making water was not discovered until she had seventeen feet of water in her hold. Captain MOLD, the commander, assisted by the dock officers, immediately did what he could towards relieving the ship, but she gradually took the bottom of the canal. As soon as practicable the guns were removed from the head, in order to prevent any disaster by the vessel keeling over. Had the ship been in the river, the consequence in all probability would have been very serious. If the report be correct, there ought to be a court-martial to inquire how the leak could have gained on her so much without any knowledge of it coming to the captain.

It appears that the Parsons gun, much approved of by the French EMPEROR, bears so close a resemblance to the system patented both at home and abroad by Captain PALLISER, that that gentleman is about to take legal proceedings to stop the sale to the French Government. The success of Mr. PARSONS in strengthening cast-iron guns by the insertion of wrought-iron tubes at the breech end has been so marked, that we are given to understand that the French Government gave Mr. PARSONS further orders on the completion of 1,000 discharges with his lined gun, the gun being all the time mounted upon its carriage, so as to throw the entire strain and jar due to the charge and weight of shot upon the breech end. The charges seem to have been principally 16 lbs., but charges of powder as high as 25 lbs. were sustained in safety by the gun, which still remains serviceable. The success in France has received the

senation of the British Government, and some of the waste guns will shortly be handed over to Mr. PARSONS for the application of his system.

A TRIPLE alliance has been signed between Brazil, Uruguay, and the Argentine Republic against Paraguay, in consequence of which 20,000 Brazilians are to be sent against the common enemy. The Brazilians, however, are very slow in their motions, and in the meantime the Paraguayan army, 5,000 strong, supported by a fleet carrying 2,500 men, has seized the city of Corrientes, without any resistance. They swept the whole country as they came along, and met with no opposition, the Brazilian fleet not going up to meet the enemy's steamers, which are said to be accompanied by numbers of canoes. The Paraguayan army is estimated at 60,000, of which 45,000 are infantry, 10,000 cavalry, and 5,000 artillery. The allied forces comprise 15,000 Brazilians in Monte Video, 15,000 in the Army of the Rio Grande and neighboring provinces, 10,000 troops disposable at Rio, 5,000 Orientals under FLORES, 10,000 Argentines under General URQUIZA, and 20,000 under the commander-in-chief, General MITRE—a total of 75,000 men. The navy is limited to Brazil, which has twenty war steamers in the River Plate, a force which can be doubled in a short time.

The following named officers are hereby announced as composing the Staff of Major-General Canby, commanding Department of the Gulf: Brigadier-General George L. Andrews, Chief of Staff; Lieutenant-Colonel C. T. Christensen, Assistant Adjutant-General; Major R. Des Anjoes, Assistant Adjutant-General; Major Alfred Fredberg, Assistant Adjutant-General; Captain J. Lovell, Assistant Adjutant-General; Captain J. C. Stone, Assistant Adjutant-General; Brevet Lieutenant-Colonel J. Schuyler Crosby, (Aide-de-Camp), Acting Assistant Adjutant-General; First Lieutenant G. W. Lyon, Adjutant First Louisiana Cavalry, Acting Assistant Adjutant-General; Second Lieutenant George L. Wilbur, First New Orleans Volunteers, Acting Assistant Adjutant-General; Lieutenant-Colonel John M. Wilson, Assistant Inspector-General; Captain James G. Patton, Thirty-third Missouri Volunteers, Acting Assistant Inspector-General; Major De Witt Clinton, Judge-Advocate; Colonel S. B. Holabird, (Additional Aide-de-Camp), Chief Quartermaster; Colonel E. G. Beckwith, (Additional Aide-de-Camp), Chief Commissary of Subsistence; Surgeon R. H. Alexander, U. S. Army, Medical Director; Brevet Major M. D. McAlester, Corps of Engineers, Chief Engineer; Captain C. J. Walker, Second U. S. Cavalry, Inspector of Cavalry; Colonel F. A. Starring, Seventy-second Illinois Volunteers, Provost-Marshal-General; Captain S. M. Eaton, Chief Signal Officer; Captain C. T. Barrett, Aide-de-Camp; Captain Edward Ames, Seventh U. S. Infantry, Acting Aide-de-Camp. All officers attached to the headquarters of the late Military Division of West Mississippi, or of the late Department of the Gulf, not enumerated above, are ordered, if belonging to the regular staff of the Army, to report by letter to the chiefs of their respective Departments; if belonging to regimental organizations, to report in person at the headquarters of their respective regiments; those who belong to the volunteer staff of the Army to proceed to their respective places of residence, and from there report by letter to the Adjutant-General of the Army.

The following named officers are announced as composing the staff of Major-General Sheridan, commanding the Military Division of the Southwest: Chief of Staff—Brigadier-General J. W. Forsyth; Adjutant-General's Department—Lieutenant-Colonel F. C. Newhall, A. A. G.; Major E. B. Parsons, A. A. G.; Major George Lee, A. A. G.; Inspector-General's Department—Brevet Brigadier-General G. A. Forsyth, A. A. I. G.; Major T. W. C. Moore, A. A. I. G.; Engineer Department—Brevet Major George L. Gillespie, Corps of Engineers, Chief Engineer; Brevet Major Vanderbilt Allen, Corps of Engineers; Medical Department—Brevet Lieutenant-Colonel J. T. Ghiselin, Surgeon U. S. A., Medical Director; Quartermaster's Department—Colonel C. G. Sawtelle, A. Q. M., U. S. A., Chief Quartermaster; Captain A. J. McGonigle, A. Q. M., U. S. A.; Subsistence Department—Colonel M. P. Small, Commissary of Subsistence, U. S. Army, Chief Commissary of Subsistence; Provost-Marshal-General's Department—Brevet Brigadier-General F. T. Sherman, A. P. M. G.; Signal Corps—Captain O. H. Howard, U. S. Signal Corps, Chief Signal Officer; Aide-de-Camp—Brevet Lieutenant-Colonel Joseph O'Keefe, Aide-de-Camp; Brevet Lieutenant-Colonel H. H. Young, Acting Aide-de-Camp, Chief of Scouts; Brevet Major M. V. Sheridan, Aide-de-Camp; Brevet Major Lawrence Kip, Acting Aide-de-Camp.

COLONEL G. W. Bradley, Quartermaster of Transportation at City Point, and Brevet Major Wiley, Chief Commissary of Subsistence of that dépôt, have both closed their affairs at that point, and gone North on leave of absence. Colonel Bradley is appointed Chief Quartermaster for the Department of Pennsylvania, and Major Wiley will probably go to Richmond.

MAJOR-General Dix, while staying at Montreal, Canada, whence he has lately returned, was presented with an address by the students of the Seminary of that city. In his reply General Dix said he was a pupil of the institution fifty years ago, and not one of his teachers were living.

COLONEL Fisher, Chief Signal Officer of the Army, has, at his request, received permission to muster out all the men of his corps whose terms of service expire prior to October 1st. Two hundred and thirty will be discharged under the order, leaving about 1,100 remaining in the corps.

BRIGADIER-General INNES N. PALMER, who has rendered such excellent service in North Carolina, has received the appointment of Brevet Major-General, dating from March 13th.

CORRESPONDENCE.

The Editor does not hold himself responsible for individual expressions of opinion, in communications addressed to the JOURNAL.

MILITARY CONVENTIONS.

To the Editor of the Army and Navy Journal:

SIR:—In writing last week on the binding effect of the conventions made by generals upon their governments, I cited a few historical examples. Let us, history in hand, see what further the jurisprudence of nations teaches us in cases of foreign war.

First Example.—In 1757, France invaded Hanover. Vanquished at Hostenbeck on the 9th of July, at Hameln on the 20th, at Minden on the third of August, at Brunswick, at Wolfenbutel and at Zeel, the Anglo-Hanoverian army, commanded by the Duke of CUMBERLAND, was driven back to the Elba at the beginning of September.

On the 8th, the Duke of RICHELIEU concluded with the Duke of CUMBERLAND, at Closter-Seven, a convention by which the foreign general agreed to abandon Hanover to France and disband his army, to send the English troops back to England, and to dismiss part of the Hanoverian troops, and leave the other portion shut up in Stade.

The King of England, dissatisfied with this convention, although he had allowed its acceptance to be believed in, profits by the too great confidence of the Duke of RICHELIEU, who has withdrawn his victorious troops, to annul the convention and retake Hanover.

Second Example.—The convention passed between General JOURDAIN and General CLAIRFAIT in 1795 was at first contested, then ratified by the government of the French Republic, not because it thought itself held to it, but because, upon reflection, it concluded that the armistice was advantageous.

Third Example.—A fact which has much analogy with recent events in this country is the affair of the *émigrés* at Quiberon in July, 1795.

Certain persons have assumed that they had capitulated, but all commentators agree with General HOCHÉ, and have established that, in the first place, the *émigrés* landed at Quiberon by the English, were driven to the extremity of the peninsula; secondly, that they asked to capitulate; thirdly, that their hopeless position did not admit of any capitulation; fourthly, that General HOCHÉ, even had he wished it, had no power to grant a capitulation under such circumstances to men guilty of high treason; fifthly, that he gave them the pure and simple order to lay down their arms and surrender at discretion, which they did; sixthly, that the commissaries of the convention, in the name of law as well as of eternal morality, saw in them only traitors to the nation, and acted accordingly.

The executive *Directoire*, the mere phantom of a government, without energy, without talent, and without perspicacity, invariably confirmed all the treaties made by its generals, including that by which BONAPARTE, on his own private authority, allowed the Grand Master of the Order of the Knights of Malta and the knights themselves a pension on the treasury of France, and, without consulting the government, as well as contrary to the laws of the republic, authorized them to return to France.

We know what was the just reward of the imbecility of the *Directoire*; it was overthrown by its general.

Fourth Example.—In January, 1799, CHAMPIONNET, at the head of 16,000 men, having driven 60,000 Neapolitans from Rome, marched upon Naples, driving before him this flock of men, commanded by the Austrian general MACK. The latter demands an armistice; CHAMPIONNET refuses and continues his march. Surrounded at St. Germano by the insurrection of the country, before having been able to reunite his 16,000 men, who marched in several columns, and having lost a part of his baggage and artillery, he receives a second proposition of armistice, addressed to him directly by the Viceroy of Naples, who offers to deliver Capua to the French, to pay ten millions of francs, to deliver up a number of posts going from the Adriatic to the Mediterranean, and to interdict the entry of the port to the English. CHAMPIONNET, only too happy, accepts on condition of the ratification of his government, but the latter refuses and orders CHAMPIONNET to seize upon Naples, which, for that matter, had been done when the answer of the *Directoire* reached him.

Fifth Example.—After the departure of the French army from Naples, the republicans, to escape the horrors committed by the hordes of Cardinal RUFFO, had fled to the fortresses of Enaf and Castel-Nuovo. Failing in provisions, they surrendered to Cardinal RUFFO, on condition that the French should return to France, and the Neapolitans should reënter Naples without being molested. The capitulation had been signed for two days past, and the English, Russian, and Turkish commanders had affixed their signatures to guarantee its execution, when NELSON appeared, having the Prince Royal on board his vessel, and declared that he did not recognize the capitulation, required surrender at discretion, had Prince CARACCIOLI hung, and gave up the unfortunate prisoners to the atrocious vengeance of the Neapolitan populace.

Sixth Example.—By a treaty concluded with NAPOLEON, FERDINAND, on his return from Spain, was to return the French prisoners to France, and the garrisons of Catalonia, which were blockaded there. The Cortes, considering FERDINAND only as a military chief, refused to execute the treaty which he had signed, and gave up neither prisoners nor garrisons.

Seventh Example.—The Duke of WELLINGTON refused to ratify the capitulation of the garrison of Santonia, which was to reënter France.

Eighth Example.—LOUIS XVIII., contrary to the capitulation of Paris, caused Marshal NEX to be shot. It was decided that military capitulation could not trammel the action of civil justice. Marshal NEX, covered by his capitulation as a military man, was tried and executed as a rebel. Be it understood that we only quote the argumentation of the judges, and state their jurisprudence.

Ninth Example.—In 1823, FERDINAND VII., reestablished upon his throne by French arms, did not respect the capitulation of Andujar, by which the Duke of ANGOULEME, the head of the French army, set the insurgent Spanish at liberty and forbade the making of fresh arrests. FERDINAND

began a series of chastisements and vengeance, which cannot be explained otherwise than by the character of ferocity peculiar to the Spanish.

Very many other examples might be cited, but these will suffice.

HISTORY.

EDUCATION AND CONFISCATION AT THE SOUTH.

To the Editor of the Army and Navy Journal:

SIR:—I venture to offer the following suggestions in regard to the proper use to be made of the proceeds of the estates confiscated at the South. It seems to me, that by turning the proceeds of confiscated property into the general treasury of the Government, we should be in danger of producing unwise exasperation among the Southern people, who would consider that we were preying upon their property with a view to lightening our own burdens; robbing them to enrich ourselves. And this exasperation would be greatly increased if General BUTLER's plan were adopted of dividing up the confiscated estates among the freedmen. This would be regarded as one of the worst forms of that race-favoritism we are seeking to overthrow; robbing one man because he has a white skin to enrich another because his skin is black or yellow.

We are well aware that confiscation is made, not with reference to the gain to ourselves from property, but to the punishment of treason. It is a *penal* measure, the revenues accruing being altogether a secondary or subsidiary consideration; and the question arises, Cannot this revenue be used in a way to allay irritation, and to secure the pacification of the country? Such a use of it may not be due to an insurgent population; but it is in the interest of the Government that it should be made. We cannot lose sight of the fact that many of these insurgents and all of their descendants are to be an integral element of our population; to be admitted to the polls and to offices of trust and honor, after the term of their disfranchisement has expired; and the Government cannot afford to lose sight of this fact in its plans of pacification. Why should we keep open a running sore in Southern society, by dividing up their forfeited estates among the negroes or among the States generally? Is it not worthy of consideration whether these estates may not be expended upon an object at the South just as essential to the life of the Government as the punishment of treason?

You will ask, perhaps, what is this object to which I would devote the proceeds of confiscation? I answer, a universal system of free school education for the whole people in the insurgent States, white and colored. In reference to the desirableness of general education there can be but one opinion among the loyal people of the country. It is the great desideratum in a government framed like ours. Other governments may stand firm, perhaps, on a basis of ignorance, but not so one of the people, not so one whose glory is in regarding every man as born with "the inalienable right to life, liberty, and the pursuit of happiness." Such a government must look for stability and power to the intelligence of the people. If the whole population of the South had enjoyed the advantages of free school education to the same extent with some portions of our common country, and had felt personally an equal interest in the success of the Confederate cause as we in ours, this war would have had a very different termination. The oft-repeated remark, that you cannot subdue a people determined to live independently of you, is true, if the people are educated to self-respect, to self-reliance, and to a share in the government as their own. The weakness of the South was in its enslaved negroes and uneducated whites.

So of the country at large, its weakness for self-defence in a great emergency, or in prosecuting the enterprises of peace, will be in proportion to the lack of education, reading, and intellectual development among the masses of its people. Mind is power; muscle is weakness, except guided by intelligence. Skilled labor is the great want of a people; labor to which reading, books, periodicals, lectures, and the pabulum of thought, are a necessity. The more you have of such labor the greater the power of a people, and the less, the more manifest their weakness.

These facts being accepted, how can the Government be indifferent to the means of education among the people of the South? True, it is believed by many that free schools are the growth of particular communities and States, and the General Government cannot interfere with them. The politicians of Virginia and of the other Southern States have held it to be unconstitutional to draw on the treasury of the Nation for the support of schools. But the Government has acted on a different view of its constitutional powers, in making large appropriations of land for educational purposes in the several States. The new States of the West, as well as our Eastern and Middle States, have been favored with large appropriations of school lands by the vote of Congress. And if it is right to do this in one State, why not in another? If it is right to give wild land to educational purposes, why not the confiscated estates of the South? Such a use of these revenues from confiscations for treason seems peculiarly appropriate. It is virtually saying: "We will simply use what we take for the good of the communities in which the seizure is made. You have suffered for lack of a free school system for your people generally, and you shall apply this property to obviate the evil. The country has suffered from the same cause, and all we ask is, that we should be secured in future by the education of all classes of the people. The properties of your people have any of them forfeited shall be used for this purpose."

But it may be said, the South will not accept your free schools. They are opposed to the education of the negroes, and will not thank you for your appropriations. They consider it unconstitutional to use the national resources for educational purposes. But it must be recollected that these views of the Southern people grew out of the existence of slavery; and their influence may continue to be felt for some time to come, but as the cause has ceased to operate, the effect will gradually vanish. Already the intelligent and liberal-minded at the South are beginning to feel that if the slaves are to be free, the only security is in teaching them self-respect; in developing their minds by schools and reading; in raising their moral tone, and in putting as much mind in them as possible, to increase the value and effici-

of their muscles. There is no doubt that convictions like these will grow upon the South as freedom advances.

To make sure that no race preferences are allowed to vitiate the system, let the confiscated funds be made an educational provision for the several States, on condition that they be applied to each town or community, or school, or district, the same as at the North, according to the number of children, white and colored, between the ages of five and twenty, or the number to be educated. Let the white children be in schools by themselves, and the colored children in schools by themselves. There is no need of embarrassing the enterprise by ideas of an intermixture or amalgamation of the races. All that the case requires is that children of all colors should have an equal share in the appropriation, and leave the rest to the operation of local causes and to the developments of time. If the people of any particular community find that they have not children enough for separate schools for white and colored children, and they can devise any plan satisfactory to themselves for uniting them in the same building and under the same teachers, let that be their concern, and not ours. Our business is the diffusion of free school education among all classes and colors, not a war of races, nor unnecessary interference with existing prejudices.

Nothing but wisdom and moderation are necessary to ensure success to meet an appropriation of confiscated property. Every year the people would more and more feel the advantages accruing to themselves from the legal infictions upon individuals on account of their treasonable practices. Every year the South and North, under the operation of the free school system, would become more and more homogeneous, and the Government more and more stable. Thus individual criminals would be made to minister to the general good, not merely by their penal sufferings from the loss of property, but by the preventive influence against their crime which that property should be made to exert.

I am sure that the subject has only to be understood at the South, and to be introduced to them under proper auspices, to ensure in its favor influential persons in all the States. They do not wish that the North should override them, even in the matter of free schools; but, as an outgrowth of Southern society, they would be accepted with favor. They are willing to secure for the object confiscated estates, provided confiscation must go on, and the application of them to schools is left to their supervision, and not to strangers.

The sooner sectional hostility, growing out of the past, dies away, the better it will be for the country. The North must regard white men as well as negroes, in forecasting for the national triumph over the insurgent sections. It must not merely look to the punishment of criminals by confiscating their property, but to the prevention of crime in the use of that property. P. C.

CREDIT TO THE MONITORS.

To the Editor of the Army and Navy Journal:

SIR:—In the blockade of our extended Southern coast line, indented with numerous sounds and inlets, which was so effectively maintained during a period of three years or more by the Navy, the arduous duties required of the Monitor fleet, at the unsafe anchorage and exposed position off Charleston, S. C., deserve more than ordinary notice. Notwithstanding these conditions, the blockade was preserved with an energy and fearlessness every way creditable to the endurance of the American sailors who served in them, and their brave leaders in command. The elements were not the only difficulties with which they had to contend. They must keep an unceasing watchfulness against a wily enemy seeking their destruction by infernal machines and torpedo boats.

It was rarely the case, during such service, that the commander and executive officer of one of these vessels, when on the advance picket, left the side of the officer of the deck, pilot, and quartermaster of the watch stationed on the turret, nor did the crew enjoy the comforts of their hammocks. With guns loaded and primed, and trained on the channels accessible to the use of adventurous blockade runners; the men grasping the lock laniards of their pieces; all eyes were strained during the long, wearisome hours of darkness, to detect, if possible, a violation of the blockade, while those below, off duty, but ready for the earliest call, were subjected to the confined atmosphere of closed hatches, not unfrequently to the unpleasant sounds of an angry sea above, and the beating of the vessel's overhang against the receding surge. Even those on the reserve, after their turns of picket duty had expired, felt the obligations of constant readiness, as supports to their brethren on the advance. It was a life of continual anxiety and watchfulness.

It is true that the Monitors, when in this position, were provided with long spars and good nettings, as securities against torpedoes, and that steam tugs passing them in near circles, with guard and scout boats ahead, gave increased confidence; yet there were the swift torpedo boats of the enemy, propelled by steam power, and the rich freights of unfriendly enterprise, "giving aid and comfort" to the enemy, to be watched and captured. So bright were the "eyes of the Government"—as the Secretary of the Rebel Navy styled the war vessels of this country in his speech before the United States Senate before he had yielded to the fatal doctrine of secession—that interest taxed ingenuity to such fineness that small vessels of the size of torpedo boats were constructed, to elude the vigilance of the blockading force, for the transportation of cotton from Rebeldom to Nassau.

This was not the only service required of the Monitors before Charleston. A decided advantage had been gained over the enemy in previous combined attacks of the Army and Navy, and the possession of Morris and Folly Islands, as depôts for supplies and bases of future operations, were important. These strongholds and favorable positions—as they have since proved themselves to be for the purposes of annoying and distressing the enemy—were to be held at all hazards.

It has been asserted that the iron-clads of the South Atlantic fleet could have entered the harbor of Charleston, reducing Fort Sumter on their way, and forcing the city itself to surrender. In the opinion of the writer—and he is

sustained by a maturer professional judgment than his own—this was impossible. Could it have been done with any assurance of success, the officers and men of the Navy were ready to attempt it, and the gallant Admiral of the fleet, to lead his command to its accomplishment; but the majority of naval men thought that, with the few available vessels of that class, without a sufficient number in reserve to support them in the event of accident, such a movement would be injudicious, and perhaps disastrous.

One of the great requisites, in a commander-in-chief, is judgment and discretion in his operations; and those familiar with military and naval science, will be forced to the admission that they have been handsomely exercised in the instance cited. S. A. B.

THE NAVAL ACADEMY.

To the Editor of the Army and Navy Journal:

SIR:—In looking over *'s article on the "Requirements of the Naval Academy," I was struck with the ability with which he presents the subject in its various lights. His suggestions are scattered through a long article, however, thus losing much force. I beg to be allowed to concentrate them, adding a few ideas of my own. I speak from experience.

It has been estimated that each midshipman graduated costs the Government between \$1,500 and \$2,000, and every one entered costs a proportion of that sum. The honor of the country depends upon the manner in which it is represented in the Service, and the efficiency of the Navy depends upon this in an equal degree.

These reasons demand—First: *More care in the selection of candidates.* Congressmen have hitherto, as a rule, sent sons of their friends to the Academy without regard to their ability. Let them take, without partiality, the best scholars in the schools of their districts hereafter, paying some attention to their physical capacity.

Second: *More rigid examinations, physical and mental, upon entering.* If more care be taken in selecting candidates there would be no need of stricter mental examinations. The physical is much easier than that of West Point, and should be more severe.

Third: *More thoroughness in the studies of the first year.* Habits of study formed in the first year are of great influence on the midshipmen during the remainder of their course. The formation of such habits is of more importance than the matter learned in doing so.

Fourth: *More attention to the qualification of Midshipmen for officers.* Nearly every class graduated has one or more in it who have not the natural ability to command, the first qualification of an officer. Any good student can go through the Academy, but it is by no means certain that he will therefore prove a good officer.

Fifth: *More attention to the instruction of French and Spanish.* These languages, besides being elegant accomplishments, are of great use to an officer. They are only partially taught.

Sixth: *More discrimination in keeping midshipmen who have failed at any examination.* I will say under this head only that there is room and demand for more care.

It has been proposed to select one half of the Midshipmen from the apprentice ship *Sabine* hereafter. It is plain that the officers of our Navy should represent the whole country. This will not be the case if they are selected from the apprentices in such a large proportion. The apprentices naturally come from the sea-board. By this there would be danger of introducing a considerable foreign element into the body of our Naval officers.

JUNE 27, 1865.

F.

THE REGULAR ARMY MONUMENT.

To the Editor of the Army and Navy Journal:

SIR:—In common with many other contributors, I would like to ask, through the medium of your paper, the committee having the matter in charge, what steps have been taken towards the erection of the "Regular Army Monument" at West Point. The Regular Army can afford to erect to the memory of its "fallen brave," a monument that will not only do honor to those whose names are inscribed thereon, but that will be a credit and adornment to its Alma Mater; and it ought to be done at once. If the fund contributed be not sufficient, I would suggest that the contributors double their subscriptions, and that any who may have omitted to forward his *mite*, be reminded; for certainly all desire to lend their aid to so worthy an object. Let the work go on. "LUKA."

FORT MONROE, VA., June 17, 1865.

PURSUANT to orders from the War Department, the Sixth United States Infantry reported on the 21st of May, 1865, for duty to the Major-General commanding the Department of the South at Hilton Head, S. C., and were by him ordered to report for assignment to duty to Brevet-Major-General Grover, commanding District of Savannah, Ga., who placed the regiment on duty in the city of Savannah. The following is a list of officers on duty with the regiment:

At Savannah.—Colonel J. D. Greene, commanding regiment; Lieutenant-Colonel H. B. Clitz; First Lieutenant J. W. Olows, Adjutant; First Lieutenant J. P. Schindel, Assistant Regimental Quartermaster. Company B—First Lieutenant A. H. Freeman, Second Lieutenant James McKim. Company G—Captains H. S. Hawkins and First Lieutenant C. M. Fyne, Brevet Captain U. S. A. Company H—First Lieutenant Thomas Britton. Company I—Captain John J. Upham, First Lieutenant C. M. Bailey. At Fort Pulaski.—Captain M. Bryant, commanding. Company D—Captain M. Bryant and Second Lieutenant S. Baker. Company K—First Lieutenant Joseph B. Rife.

ORDERS have been issued reducing the Mississippi Squadron to fifteen vessels. Acting Rear-Admiral S. P. Lee will remain in command, with Lieutenant-Commanders E. Y. McCauley, J. J. Cornwell, and J. P. Foster, as his three division commanders. Three gunboats are left at the mouth of the Red River. All the mortar vessels, and all the iron-clads, except the *Tennessee* and *Missouri*, are ordered to Memphis, and will at once be put out of commission. All the other vessels now in the squadron will be sent up to Mound City immediately, and also be put out of commission. The *Tamper* will hereafter be the flagship of the squadron.

ARMY AND NAVY PERSONAL.

GENERAL Canby arrived at Cairo on the 26th of June.

MAJOR-General Rawlins and family have left Washington for a visit to the West.

COLONEL J. C. Briscoe, of the Pennsylvania Volunteers, is made a Brigadier-General by brevet.

BREVET Major Edward Moale has been made a full Lieutenant and Assistant Adjutant-General in the Regular Army.

COLONEL Reno, formerly of General Torbert's staff, has been brevetted Brigadier for gallant and meritorious services.

LIEUTENANT-Colonel Mann, of the Thirty-ninth Illinois Volunteers, is promoted to be a Brigadier-General by brevet.

MAJOR-General Sickles left the Isthmus of Panama on June 16th for New York, where he arrived on Monday, the 26th.

COLONEL Thomas O. Osborne, Thirty-ninth Illinois Volunteers, has been made a full Brigadier-General of Volunteers.

COLONEL J. H. Potter, Chief of Staff of the Twenty-fourth army corps, has been promoted to be a full Brigadier-General.

LIEUTENANT-Colonel Frederick C. Newhall, Assistant Adjutant-General on Major-General Sheridan's staff, has resigned.

GENERAL Rucker, of the Quartermaster's Department, has been appointed Brevet Brigadier-General in the Regular Army.

BRIGADIER Generals Andrew J. Hamilton, Edward Harlan, Robert A. Cameron, A. J. Lightburn and Joseph Bailey have resigned.

MAJOR-General E. O. C. Ord, lately commanding the Department of Virginia, has been assigned to the command of the Department of Ohio.

COLONEL E. Whittlesey, Commissioner of the Refugees and Freedmen's Bureau, has arrived in Raleigh, and established his headquarters there.

MAJOR-General Meade declines an invitation to visit Boston on the Fourth of July on account of a prior engagement to be at Gettysburgh on that day.

BREVET Major-General Alfred Gibbs and Brevet Brigadier General Fitzhugh, United States Volunteers, have been ordered to report to Major-General Sheridan.

MAJOR-General George Crook has been relieved from command of his cavalry corps, and ordered to report to the Adjutant-General by letter from his place of residence.

MAJOR-General Gordon Granger assumed command of all troops within the State of Texas, on the 17th of June. General Granger is under orders of Major-General Sheridan.

By direction of the President a court-martial, with Brevet Major-General J. B. Ricketts as president, has been ordered to convene at Annapolis for the trial of such cases as may come before it.

BRIGADIER-General R. H. Jackson, commanding a division of the Twenty-fifth army corps, under Major-General Godfrey Weitzel, has been promoted to the rank of Brevet Major-General.

LIEUTENANT-Colonel D. E. Clapp, Thirty-Eighth United States Colored Troops, who was in April last dismissed the service by Major-General Ord, has been reinstated by the Secretary of War.

A MAGNIFICENT silver salver and tea-set was a few days ago presented to Colonel Wilson, Chief Commissary of Subsistence of the Army of the Potomac, by the officers of the Commissary Department.

BREVET Brigadier-General James L. Donaldson, Assistant Quartermaster, United States Army, has been appointed Chief Quartermaster of the military division of the Tennessee under Major-General George H. Thomas.

MAJOR-General Augur has returned from furlough, and resumed command of the Department of Washington; Major-General Parke, temporarily in command of that Department, is in charge of the District of Alexandria.

LIEUTENANT-Colonel J. W. Waite has been relieved from duty as Acting Assistant Inspector General at the headquarters of the Department of Washington, and ordered to St. Louis to report to his regiment, the Eighth Illinois Cavalry.

MAJOR E. H. Little has been promoted to be Lieutenant-Colonel One Hundred and Twenty-seventh New-York Volunteers, vice Lieutenant-Colonel Woodford promoted, and Captain Frank K. Smith to be Major, vice Major E. H. Little promoted.

MAJOR-General J. M. Schofield, accompanied by Colonel Wherry, Lieutenant-Colonel Campbell, Major Lord, and Captain Winslow, of his staff, arrived in Washington on Sunday from Newbern. General Schofield arrived in New York on Wednesday.

LIEUTENANT-General Grant and Major-General Hooker have accepted Governor Fenton's invitation to be present on the occasion of the presentation of the flags borne by the New-York regiments throughout the war to the State, on the Fourth of July next.

LIEUTENANT-Colonel Albert Ordway, of the Twenty-fourth Massachusetts Volunteers, has been appointed Provost-Marshal-General of the Department of Virginia, Major-General Alfred H. Terry commanding, in place of General Patrick, resigned.

FIRST Lieutenant D. A. Nevin, Adjutant of the One Hundred and Sixty-ninth New York Infantry, and First Lieutenant D. Beebe, Adjutant of the Third New York Infantry, have been announced upon the personal staff of Major-General N. M. Curtis.

LIEUTENANT-Colonel S. M. Lyman, Medical Inspector U. S. A., has been ordered, at the request of the Commissary-General of Prisoners, to make an inspection of the rebel prison camps near New York, in order to ascertain the cause of the excessive mortality among the prisoners.

SECOND Lieutenant James Hough, Veteran Reserve Corps, has been promoted to be First Lieutenant, to date from the 3d April, 1865, he having appeared before the Board for examination of officers, at Washington, D. C., and passed a creditable examination.

A BOARD of six engineer officers, consisting of Brevet Major-General Benham, Colonel Alexander, and others, has been appointed to convene at Boston, for the purpose of examining the New England coast and its defences, from Cape Cod to Quoddy Head, at the entrance of the St. Croix river.

THE officers of the Second division, Twentieth corps (General John W. Geary), have formed an association "for the perpetuation of the ties of friendship and brotherhood formed in the field." This association is named the "White Star Union," and is to meet in anniversary session on the second day of each September. The first anniversary meeting will be held on September 2d next in Philadelphia.

MAJOR-General Thomas, commanding the Military Division of the Tennessee, embracing the States of Kentucky, Tennessee, Georgia, Alabama, and Florida, with headquarters at Nashville, has assigned Major-General Palmer to command in Kentucky, Major-General Stoneman in Tennessee, Major-General Steedman in Georgia, Major-General Humphrey in Florida, and Major-General C. R. Woods in Alabama.

A GENERAL Court-Martial finds Captain George Bennett, of the Union Life Guard, guilty of misapplying provisions belonging to the United States, etc., and sentences him to be dismissed the service, and forfeit all pay and allowances due. The findings and sentence are approved. The Union Light Guard is the company of cavalry that attends the President as his body-guard. The command of the company devolves upon Lieutenant Jamieson.

REAR-Admiral Dahlgren arrived at Washington from the South Atlantic squadron on Thursday, June 21st, on the United States steam ship *Patience*, Lieutenant William Whitehead. The *Patience* was accompanied by the *Germania*, Acting Master Henry Pease, jr., commanding, and the *Iris*, Acting Ensign Dames, commanding. Admiral Dahlgren has three months leave from duty, has come North from Washington on pleasure and private business.

BREVE Brigadier-General Wager Swayne, late Colonel of the Forty-third Ohio Volunteers, who lost a leg at the battle of River's Bridge, S. C., has been temporarily appointed Assistant Commissioner of Freedmen for the State of Alabama, in place of Colonel T. W. Osborne, of the First New York Artillery. The former appointee is delayed at home by the breaking of his arm by a railroad accident while on his way to report to General Howard.

BRIGADIER-General T. F. Meagher, who has recently resigned from the Volunteer service, is the officer who raised and commanded the old Irish Brigade, of the Army of the Potomac, with which he did good service until his brigade was entirely broken up by losses, when he resigned. He was subsequently reinstated in command, and assigned to the command of a garrison in the Department of Tennessee, where he remained until ordered to join General Sherman, on his arrival at the Atlantic coast.

MAJOR-General Hurlbut, of Illinois, who for a year past has commanded the Department of the Gulf, has demanded a court-martial, on account of charges advanced against him while in that command by Major-General W. F. Smith and others. The court-martial in the case of General Hurlbut will be one of the largest convened during the war, it being composed of seven Major-Generals from Major-General Canby's Department, and several from the North. The trial will probably take place in New Orleans.

BREVE Brigadier-General A. L. Pearson, late commanding officer of the First brigade, First division, Fifth corps—prior to his leaving the Service—received the appointment of Brevet Major-General United States Volunteers, to rank as such from May 1st, 1865. General Pearson entered the service as a Captain in the One Hundred and Fifty-fifth Pennsylvania Volunteers. He was among the youngest Major-Generals in the United States Army, being but 28 years of age.

A NEW board has been ordered by the War Department for the examination of officers appointed for Major-General Hancock's First Army corps. The board consists of the following named officers:—Brigadier-General T. H. Neill, Brigadier-General Francis Fessenden, Brigadier-General C. H. Morgan, Colonel Charles Bird, Lieutenant-Colonel M. T. Gallagher and Surgeon Thomas Betton, of the First corps. This board assembled on the 22d of June at Camp Stoneman, D. C., where the troops of the corps are encamped.

BRIGADIER-General George H. Gordon, commanding the District of Virginia, has been relieved, and has left Norfolk for Boston. He turned over the affairs of the district to Colonel Howard, Thirteenth New York Heavy Artillery, who is merely to act as commander of the military station at the post of Norfolk. General Gordon's staff, consisting of Lieutenant-Colonel T. H. Harris, A. A. G.; Major Markley, A. A. G.; Major John A. Darling, Lieutenant S. R. Morgan, and Lieutenant O. P. Brown, are either ordered to their regiments or mustered out of service.

MAJOR W. H. Lamson died in Lowell, Massachusetts, on Sunday, June 25th, at the age of thirty-five. On the 16th of September, 1861, he was commissioned as a Lieutenant in the Sixteenth Massachusetts, but was discharged on the 31st March in the following year on account of disability. He was instrumental in organizing two companies in Lowell for the Thirty-third regiment, and was commissioned as a Captain in that regiment July 31st, 1862. May 12, 1863, he was promoted to the rank of Major, which position he held until the time of his discharge on account of ill health, March 8, 1864.

J. M. EYSTER, late Captain, Eighteenth United States Infantry, sentenced by a General Court-Martial "To be imprisoned at such place as the Secretary of War may direct, for and during the term of six calendar months, and that he refund to the United States the sum of nine hundred and fifty-three dollars and thirty-five cents, (\$953 35), the sum so embezzled, and that he be cashiered and dishonorably dismissed the service of the United

"States," and undergoing execution of sentence at Fort Delaware, as promulgated in General Court-Martial Orders, No. 82, War Department, Adjutant-General's Office, February 15, 1865, will be released from confinement upon repayment of the amount of money which he was found to have embezzled.

THE following officers in the Department of the South have recently been promoted:—Brigadier-General E. E. Potter, to be Brevet Major-General U. S. V.; Brigadier-General John P. Hatch, to be Brevet Major-General U. S. V.; Colonel C. L. Kilburn, U. S. A., to be Brevet Brigadier-General U. S. V.; Major C. W. Thomas, U. S. V., to be Brevet Major U. S. A.; Major B. W. Thompson, Provost-Marshal-General of this Department, Thirty-second U. S. C. T., to be Lieutenant-Colonel of the same regiment; Captain Charles R. Suter, U. S. Engineers, to be Brevet Major U. S. A.; Captain Leslie Smith, U. S. A., to be Brevet Major U. S. A.; Captain S. M. Taylor, A. A. G. on General Saxton's staff, to be Brevet Major U. S. V.; First Lieutenant Isaac N. Arnold, U. S. A., to be Brevet Captain U. S. A.

ON the evening of the 10th of June, Surgeon B. J. D. Irwin, Superintendent of the Military General Hospitals at Memphis, Tenn., was presented with an elegant breast-pin by the surgeons of the different hospitals. After the reading of a series of resolutions adopted at a recent meeting of the hospital surgeons, in which the chief surgeon's distinguished services and their appreciation of him as an officer and gentleman were appropriately and feelingly alluded to, the present was conveyed to Dr. Irwin by Surgeon Studie, in a brief address. Dr. Irwin, in a few fitting words, thanked the donors for their beautiful gift. In an entertainment which followed, Surgeon Studie proposed the health of Surgeon John E. Summers, Lieutenant-Colonel U. S. A., and Medical Inspector for the Department, who pleasantly acknowledged the compliment. The whole affair was very hearty and agreeable.

THE following named officers are announced by Colonel W. A. Howard, commanding, as constituting the Staff of the sub-district of Norfolk, Virginia:—Brevet Colonel A. P. Blunt, A. Q. M., Post Quartermaster; Surgeon J. J. Delamater, United States Volunteers, Medical Director; Major F. R. Hassler, Thirteenth New-York Artillery, Acting Ordnance Officer; Captain William N. Felt, United States Volunteers, Post Commissary of Subsistence, Norfolk; Captain George F. Thompson, United States Volunteers, Post Commissary of Subsistence, Portsmouth; Captain T. R. Scarborough, One Hundred and Fourth Pennsylvania Volunteers, Acting Assistant Inspector-General; Lieutenant G. R. Vernon, Fourteenth United States Infantry, Assistant Commissary of Musters; Lieutenant Charles P. Brown, Fifteenth Connecticut Volunteers, Assistant Commissary of Musters; Lieutenant Howard Rogers, Thirteenth New-York Artillery, Acting Assistant Adjutant-General.

AT the sale of vessels lately attached to the Potomac Flotilla held in Washington June 21, the following vessels were knocked down:—Wooden side-wheel steamer *Baltimore*, length 200 feet; \$16,600; purchaser, Thomas Clyde, of Philadelphia. Propeller *Watch*, length 62 feet; \$2,600; purchaser, Robert Lear, of Baltimore. The single engine propeller *Thayer*, length 80 feet; \$2,500; purchaser, James Bigler, New York. The double engine propeller *Resolute*, length 81 feet; \$6,300; purchaser, T. J. Southard, Richmond, Me. Single engine propeller *Zela*, length 63 feet; \$450; purchaser, Gilbert Vanderwerken, Georgetown, D. C. Wooden propeller *Mythic*, length 157 feet; \$9,500; purchaser, T. P. Morgan, Washington. Wooden propeller *Western World*, originally from New York, 178 feet; purchaser, H. R. Hazelhurst, Baltimore. Other vessels were offered but withdrawn, the bids not being high enough. Among them was the *Bat*, paddle-wheel steamer, made of steel plates—only \$55,000 were offered for her, though her engines are said to be worth more than that. Several tug propellers were offered, but there was no sale for them. About 150 persons, from various parts of the country, were present at the sale. It was announced that three weeks from to day there will be another large sale of Government vessels.

PROCLAMATION BY THE PRESIDENT.

Whereas, By the proclamation of the President of the 15th and 27th of April, 1861, a blockade of certain ports of the United States was set on foot; and whereas, the reasons for that measure have ceased to exist; now, therefore, be it known that I, Andrew Johnson, President of the United States, do hereby declare and proclaim the blockade aforesaid to be rescinded as to all the ports aforesaid, including that of Galveston and other ports west of the Mississippi River, which ports will be open to foreign commerce on the 1st of July next, on the terms and conditions set forth in my proclamation of the 22d of May last. It is to be understood, however, that the blockade thus rescinded was an international measure, for the purpose of protecting the sovereign rights of the United States. The greater or less subversion of the civil authority in the region to which it applied, and the impracticability of at once restoring that in due efficiency, may, for a season, make it advisable to employ the Army and Navy of the United States toward carrying the laws into effect wherever such employment may be necessary.

In testimony whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Done at the city of Washington, this twenty-third day of June, in the year of our Lord, 1865, and of the independence of the United States of America the eighty-ninth.

By the President,
W. HUNTER, Acting Secretary of State.

FAREWELL OF MAJOR-GENERAL MEADE TO THE ARMY OF THE POTOMAC.

HEADQUARTERS OF THE ARMY OF THE POTOMAC,
June 28, 1865.

Soldiers: This day two years ago I assumed command of you under the orders of the President of the United States. To-day, by virtue of the same authority, the Army ceasing to exist, I have to announce my transfer to other duties and my separation from you.

It is unnecessary to enumerate all that has occurred in these two eventful years, from the grand and decisive battle of Gettysburg, the turning point of the war, to the surrender of the army of Northern Virginia at Appomattox Court House, suffice it to say that history will do you justice. A grateful country will honor the living, cherish and support the disabled, and sincerely mourn the dead.

In parting from you, your commanding general will ever bear in memory your noble devotion to your country, your patience and cheerfulness under all the privations and sacrifices you have been called on to endure.

Soldiers, having accomplished the work set before us, having vindicated the honor and integrity of our Government and flag, let us return thanks to Almighty God for his blessing in granting us victory and peace, and let us earnestly pray for strength and light to discharge our duties as citizens, as we have endeavored to discharge them as soldiers.

GEORGE G. MEADE, Major General U. S. A.

THE FOURTH REGIMENT U. S. INFANTRY.

AN officer of the Fourth regiment U. S. Infantry furnishes us with the following list of general officers who now belong, or have belonged, to that regiment, and a list of battles, sieges and skirmishes in which the regiment has borne a meritorious part since its re-organization in 1808. The list is a valuable one for every member of the Fourth Infantry, and furnishes an interesting chapter in the history of our Army. The Fourth regiment may well be proud of the fact that it has furnished from the ranks of its officers such soldiers as GRANT and SHERIDAN, and the numerous other general officers who stand second only because the list is headed by those two great names. We should be glad to publish a similar record for every regiment in the Army. Is there not some officer in each regiment who has interest enough in its military history to complete the record?

GENERAL OFFICERS.

Lieutenant-General U. S. Grant, U. S. Army.
Major General P. H. Sheridan, U. S. Army.
Major General Silas Casey, U. S. Vols.
Major-General C. C. Augur, U. S. Vols.
Major-General George Crook, U. S. Vols.
Brevet Major-General A. V. Kautz, U. S. Vols.
Brigadier-General Lorenzo Thomas, U. S. Army.
Brigadier-General George Wright, U. S. Vols.
Brigadier-General William S. Ketchum, U. S. Vols.
Brigadier-General Henry M. Judah, U. S. Vols.
Brigadier-General Benjamin Alvord, U. S. Vols.
Brigadier-General Henry Price, U. S. Vols.
Brigadier-General Alexander Hays, U. S. Vols.
Brigadier-General A. J. Stemmer, U. S. Vols.
Brigadier-General David A. Russell, U. S. Vols.
Brigadier-General Lewis C. Hunt, U. S. Vols.
Brigadier-General F. T. Dent, U. S. Vols.

BATTLES, SIEGES AND SKIRMISHES.

Tippecanoe, November 7, 1811.—Captain W. C. Baen, killed; Lieutenants George F. Peters and George Gooding, and Ensign Henry Breckstedt, wounded. Total loss, 22 killed and 65 wounded.
Manguo or Brownstown, August 9, 1812.—Lieutenants Charles Larrabee and George P. Peters and Ensign Whistler, wounded; 10 non-commissioned officers and privates killed, and 45 wounded.
La Cole Mill, March 30, 1814.—Loss, 1 killed and 1 wounded.
Siege of Flatshoe, September 6 to 11, 1814.—Loss, 1 killed and 1 wounded.
Apalachicola River, December 15 and 16, 1817.—Brevet Major Peter Muhlenburg, Fourth Infantry, commanding 120 men of Fourth and Seventh Infantry, engagement with Seminoles and negroes. Our loss 2 killed and 15 wounded.
Affair near Newtown, Ga., November 23, 1817.—Lieutenant-Colonel Archibuck, Fourth Infantry, commanding 300 men of Fourth and Seventh regiments. Loss, 1 killed and 2 wounded.
Capture of Fort San Carlos de Barrancas, Florida, May 25 and 27, 1818.—Major-General Jackson, commanding. Loss in Fourth Infantry, 2 killed.
Dade's Massacre, Florida, December 28, 1835.—Brevet Major Francis L. Dade, Fourth Infantry, commanding battalion of Third Artillery and Fourth Infantry. Attacked by Seminoles and negroes; our men fought, without attempting to retreat, till every man was killed or wounded; but three men escaped.
Withlacoochee River, Florida, December 31, 1835.—Brevet Major-General Duncan L. Clinch, Fourth Infantry, commanding. Captain William M. Graham and 7 enlisted men wounded in Fourth Infantry.
"Chasing Pen," Florida, February 27, 28, 29, and March 5, 1836.—Loss, 8 wounded. Seven companies of regiment engaged.
Oloklakha, Florida, March 31, 1833.—Loss, 1 wounded. Six companies of regiment engaged.
Thlonotosaas, Fla., April 27, 1836.—Loss, 2 killed and 3 wounded.
Affair on Clair River, Florida, February 9, 1837.—Boat expedition, commanded by Captain George W. Allen, Fourth Infantry. Loss, 1 killed.
Okeechobee, Florida, December 25, 1837.—Colonel Z. Taylor, commanding. Lieutenant John L. Hooper, Fourth Infantry, and 18 privates wounded, and 3 killed.
Piahiakaha, Florida, April 19, 1842.—Loss not known.
Palo Alto, May 8, 1846.—Captain John Page, mortally wounded. Total loss, 8 killed and 5 wounded.
Resaca de Palma, May 9, 1846.—Lieutenant Richard E. Cochrane, killed. Total loss, 4 killed and 6 wounded.
Monterey, September 21, 22 and 23, 1846.—Lieutenant Charles Hoskins, killed, and Lieutenant R. M. Graham, mortally wounded. Total loss, 9 killed, 5 mortally wounded, and 24 wounded.
Siege of Vera Cruz, March 8 to 28, 1847.—No loss.
"Affair of Colonel McIntosh," June 6, 1847.—6 killed and wounded.
"Affairs of Major Lally," August 10, 12, 15 and 19, 1847.—12 killed and wounded.
Churubusco, August 20, 1847.—3 killed, 8 wounded and 4 missing.
El Molino del Rey, September 8, 1847.—Lieutenants H. E. Prince, Sidney Smith, H. M. Judah and George Lincoln, wounded. Total loss, 8 killed, 49 wounded, and 1 missing.
Chapultepec, September 12 and 13, 1847.—Lieutenant A. P. B. Rogers, killed, and Lieutenant M. Maloney, wounded.
Capture of City of Mexico, September 14, 1847.—Lieutenant Sidney Smith, mortally wounded. Total loss on September 12, 13 and 14, 11 killed and 36 wounded.
Galaxa, November 24, 1847.—Lieutenant Henderson Ridgley, killed.
Red Bluffs, (Cal.), March 24, 1852.—Lieutenant E. Russell, killed.
Kogue River, (Oregon), August, 1853.—Captain Bradford R. Alder, wounded.
Brannan's Prairie, (W. T.), December 4, 1855.—Lieutenant W. A. Blaughter, killed.
White River, (W. T.), 1856.—Lieutenant A. V. Kautz, wounded.
Kogue River Campaign, March, April and May, 1856.—Under command of Brevet Lieutenant Colonel R. C. Buchanan, Fourth Infantry.
Siege of Yorktown, April 5 to May 4, 1862.—Loss not known.
Gaines' Mill, June 27, 1862.—Captain R. N. Scott and Lieutenant Julius W. Adams, wounded; loss of enlisted men not known.
Malvern Hill, July 1, 1862.—Loss not known.
Second Bull Run, August 30, 1862.—Captain Joseph B. Collins, wounded; other loss not known.
Antietam, September 17, 1862.—Lieutenants Robert P. McKibbin and John Miller, wounded; other loss not known.
Fredericksburg, December 13, 14 and 15, 1862.—Captain A. E. Benedict and Lieutenant Ira F. Genesl, wounded, (the latter died of wound); other loss not known.
Chancellorsville, May 2, 1863.—Loss not known.
Gettysburg, July 1, 2 and 3, 1863.—Lieutenants Samuel F. Crowley and George Williams, wounded; other loss not known.
Wilderness, May, 1864.—Captains Charles H. Brightly and Thomas A. Martin and Lieutenant John Simons, wounded; other loss not known.
Spottsylvania, 1864.—Loss not known.
North Anna River, 1864.—Lieutenants George Atcheson and Samuel T. Crowley, wounded; other loss not known.
Cool Arbor, 1864.—Loss not known.
Petersburg.—Captain Alexander Carolina and Lieutenants R. P. McKibbin and I. J. S. Hassler, wounded; other loss not known.

It is said the Government intends to send the *Monadnock* and *Miantonomah*, both wooden Monitors, and built in Government yards, to Europe. We hope the report is true.

REPORT OF THE SECRETARY OF WAR.

The Report of the Secretary of War for 1864, is now published. Its great length precludes the possibility of our publishing it in full this week. Included in it are the reports of the different bureaus of the War Department; the Adjutant-General's, Paymaster-General's, Ordnance, Engineer's, Subistence, Quartermaster-General's, Provost-Marshal-General's, and Surgeon-General's reports. Some of the more important statistics are presented in the abstract given below:

THE ADJUTANT-GENERAL'S REPORT.

From the Adjutant-General's Report we learn that from the 1st of January, 1864, to the 31st of October of the same year the enlistments into the Regular Army numbered 13,019 men, and the transfers from the Army to the Navy, in the same period, numbered 2,568 men.

Between the 1st of November, 1863, and the 31st of October, 1864, there were forwarded to the field:

One, two, and three year's recruits, for old and new organizations.....	366,459
Drafted men.....	42,727
One hundred-day troops.....	80,640

In the same period there were mustered out and discharged:

Three year volunteers.....	51,174
One hundred-day troops.....	80,640
Veterans furloughed and returned to the field.....	136,800

Total discharged, forwarded, and furloughed..... 757,940

Over two hundred flags captured from the rebels in various battles, have been received. They have been properly labeled, registered, and deposited for safe keeping. Many others are supposed to have been disposed of by persons who captured, or had them in possession, in ignorance of their being public property.

One hundred and six enlisted men were presented with medals of honor for capturing rebel flags and other acts of bravery.

THE COLORED TROOPS.

Colonel Foster, in charge of the bureau of colored troops, reports that on the 31st of October, 1863, there were fifty-eight regiments of colored troops, numbering thirty-seven thousand seven hundred and seven men. On October 30, 1864, there were in the service one hundred and forty regiments, including all arms, with a total strength of one hundred and one thousand nine hundred and fifty, divided as follows, viz:

Twelve regiments artillery, heavy.....	12,226
Artillery (light), eight batteries.....	853
Six regiments cavalry.....	5,606
One hundred and twenty one regiments infantry.....	83,286

Total..... 101,950

This branch of the service, up to that time (October 30, 1864) lost by battle, discharge, desertions, and diseases, 33,139 men. From July 4th, 1864, to October 16th, 1864, 2,519 colored recruits were mustered into the service.

Up to November 7th, 1864, General L. Thomas had organized along the Mississippi river the following colored troops:

Four regiments of cavalry.....	4,800
Six regiments of heavy artillery.....	10,800
Four companies of light artillery.....	720
Forty regiments of infantry.....	40,000

Total..... 56,320

The number of soldiers would have been larger but for the pressing need for the negroes in the Quartermaster and Commissary Departments.

CHIEF ENGINEER'S DEPARTMENT.

The total amount expended by this department for the year was \$6,345,191.74. The amount appropriated by Congress for the prosecution of the works on which this sum has been expended, including the Military Academy, was \$6,959,247.

The Military Academy has continued to fulfill the purpose for which it was created, by collecting and procuring from all nations the arts and sciences connected with the defence of our country, and imparting the knowledge of them, so far as it is applicable to our people, to the cadets enjoying the benefit of a military education at this national institution.

SUBSISTENCE DEPARTMENT.

The supplies of subsistence stores for the Army have been mostly procured in the markets of Boston, New York, Philadelphia, Baltimore, Washington, Cincinnati, Louisville, Chicago, and St. Louis, and forwarded from these points to the principal depots for the several armies in the field, whence they have been distributed to minor, less permanent, or more advanced depots, according to the varying wants and positions of the troops. Subsistence stores to a limited extent have also been purchased at many other points when required for local issues.

The reduction of the ration by 1/10 of June 20, 1864, to the ration as it existed before the act of August 8, 1861, is proved to be a measure of economy, whilst it provides the soldier with a sufficient quantity of food. Some officers familiar with the subject are of opinion that the ration may be improved without adding materially to its cost, in which opinion General Dyer refuses to concur.

JUDGE ADVOCATE-GENERAL'S DEPARTMENT.

The operations of this bureau for the sixteen months previous to March, 1865, were as follows:

Number of records of general courts-martial and military commissions reviewed.....	33,896
Number of reports made as to the regularity of proceedings on applications for restoration to the service, the pardon of offenders, the remission or commutation of sentences, and upon miscellaneous questions referred to this office.....	9,310

THE PROVOST-MARSHAL-GENERAL'S DEPARTMENT.

The report of this officer is, in many respects, the most interesting of the documents from which we quote. The report is dated November 15, 1864. From July 1st, 1864, up to that time, 130,000 names were added to the enrollment list, and 285,598 names stricken off. This enrollment showed the national forces, not called out up to November 1, 1864, to consist of 2,784,228 men. In the draft of 1863, the quota drafted for was 194,962, with fifty per cent. added. Of this number 39,417 failed to report, and 161,887 were exempted from physical and other causes, 62,287 paid commutation, 26,002 furnished substitutes, and 9,845 were held to service.

On the 1st of May, 1864, another draft was drawn.

The total deficiency drafted for was.....	50,367
The number reported and examined.....	85,861
The number exempted for physical disability.....	21,446
The number exempted for other causes.....	19,645
The number held to personal service.....	3,418
The number furnished substitutes.....	8,903
The number who paid commutation.....	34,446

On September 19, 1864, another draft was had, and the result, known up to November 1st, was as follows:

Number reported and examined.....	72,432
Number exempted for physical disability.....	20,332
Number exempted for other causes.....	19,697
Number held to personal service.....	19,068
Number furnished substitutes.....	13,345

The recruiting in rebel States did not progress as satisfactorily as the loyal governors anticipated. The result on November 1st was as follows:

Total number of recruiting agents appointed by Governors of loyal States to recruit in rebel States.....	1,645
Total number of recruits obtained by these agents.....	2,931

FOR THE ARMY.

Volunteers, white and colored, in loyal States, between November 1, 1863, and November 1, 1864.....	402,598
Volunteers, colored, enlisted in the States in rebellion, between January 1, 1864, and October 15, 1864, and not embraced in the above.....	22,143
Recruits for Regular Army, between January 1, 1864, and October 31, 1864.....	13,871
Veterans who re-enlisted before the expiration of their terms of service, between November 1, 1863, and November 1, 1864.....	130,507
Drafted men and substitutes for drafted men, and men liable to draft, to November 1, 1864.....	75,550

650,709

Enlistments in the naval service, between February 24, 1864, and November 1, 1864..... 22,930

Enlistments in the marine corps, between February 24, 1864, and November 1, 1864..... 1,783

In estimating the number of troops called into service it has been the rule of the Department to take into account the whole number of men mustered, without regard to the fact that the same persons may have been previously discharged after having been accepted and credited on preceding calls.

A large part (near two hundred thousand) of the men accepted in the years 1861 and 1862 were soon found to be unfit for service, and were discharged. (This accounts, partially, for the large excess carried forward from the calls of 1862 and deducted from those of 1863.) The amount of money received from commutation prior to November 1, 1863, as stated in the last annual report, was..... \$10,518,000 00

The amount received since that report, and prior to November 1, 1864..... 15,066,599 25

Total received..... \$25,584,599 25

The number of deserters arrested between October 1, 1863, and September 30, 1864, was 39,392.

The total number arrested from the time this branch of the bureau went into operation, May 1, 1863, to September 30, 1864, was 60,760, being an average of 3,574 per month; from which it may be inferred that not many who remain in the country escape arrest.

Accompanying General Fry's report, are twenty-two tables of medical statistics, with comparison statements.

The following is the number examined, and the number rejected for physical and mental disability, together with the ratio per 1,000 of exemptions under the first draft:

States.	Number rejected.	Number examined.	Ratio per 1,000.
Maine.....	5,943	14,304	415.47
New Hampshire.....	2,591	7,375	351.32
Vermont.....	2,183	6,719	324.89
Massachusetts.....	12,344	29,028	425.24
Rhode Island.....	1,329	4,097	322.18
Connecticut.....	8,164	10,818	292.47
New York, southern division.....	6,338	24,627	257.35
New York, northern division.....	8,627	27,668	311.91
New York, western division.....	10,524	29,759	353.04
Pennsylvania, eastern division.....	9,806	36,294	370.18
Pennsylvania, western division.....	10,130	35,697	384.46
Delaware.....	694	2,175	319.68
Maryland.....	1,116	4,821	331.48
District of Columbia.....	1,184	4,240	282.68
Wisconsin.....	2,671	12,237	218.27
Michigan.....	1,549	6,879	278.27
Total.....	80,134	255,188	314.02

Under the second draft the same exhibit is as follows:

States.	Number exempted.	Number examined.	Ratio per 1,000.
New Hampshire.....	441	1,441	306.
Vermont.....	45	197	243.6
Massachusetts.....	1,837	6,689	274.6
New York.....	1,668	6,639	251.5
New Jersey.....	1,446	7,728	187.1
Pennsylvania.....	2,480	10,941	226.67
Delaware.....	369	1,692	218.09
Maryland.....	2,655	7,686	345.43
Minnesota.....	1,056	3,125	287.42
Kentucky.....	961	4,461	215.82
Ohio.....	2,649	10,299	257.21
Michigan.....	136	368	369.56
Total.....	15,744	61,267	257.02

* In those States not named there were no drafts.

Table showing the ratio of exemptions from military service for mental and physical infirmities in the United States, France, Great Britain, and Belgium.

Nations.	Years.	Ratio rejected per 1,000 examined.
United States.....	1863 1864*	314.02 257.02
France.....	1831 to 1843 1859	324.4 317
Great Britain.....	1832 to 1851, and 1860 to 1862.	317.3
Belgium.....	1851 to 1855	320.6

*supplementary draft.

The average measurement of the chests (at inspiration) of recruits, substitutes, and drafted men in certain States was as follows:—

New Hampshire, 34.62 inches; Vermont, 36.5; Massachusetts, 34.83; New York, 35.50; New Jersey, 34.87; Pennsylvania, 34.92; Delaware, 35; Maryland, 35.42; Minnesota, 36.1; Kentucky, 35.59; Ohio, 35.79; Michigan, 36. Total, 35.16

The average height of the same persons were as follows:—

New Hampshire, 5 feet 5 7/8 inches; Vermont, 5 feet 7 1/2; Massachusetts, 5 feet 7 1/4; New York, 5 feet 5 1/2; New Jersey, 5 feet 6 1/8; Pennsylvania, 5 feet 6 1/8; Delaware, 5 feet 6 1/8; Maryland, 5 feet 5 3/8; Minnesota, 5 feet 5 1/2; Kentucky, 5 feet 7 1/2; Ohio, 5 feet 6 1/4; Michigan, 5 feet 6 1/4. Total height, 5 feet 6 1/4

THE VETERAN RESERVE CORPS.

The medical statistics of the Veteran Reserve Corps are very interesting.

The principal disabilities for which enlisted men have been transferred to this corps is as follows:—

Gun-shot wounds, chronic diarrhoea, injuries, disease of heart, rheumatism, hernia.

The ratio per thousand of gun-shot wounds greatly exceeds that of any other disability for which men in this corps has been transferred to it on account of disability produced by honorable wounds.

The list of injuries is not included in this report; if it should it would give a ratio of 326.72 per thousand, nearly every third man.

The prevalence of diarrhoea in its several stages in the Army of the United States, for the year ending June 30, 1862, was 653.47 cases in every thousand men; it is not, therefore, a matter of surprise that the ratio of this disease in the disabilities of the Veteran Reserve Corps, in its chronic form, is found to be 91.68 per thousand.

Disease of the heart occurs in the ratio of 69.39 per thousand, or one in 144. This disease has been one of the most prolific causes for the discharge of men from the service. For the first two months of 1863, the ratio per thousand discharged for disease of the heart, was 137. In chronic rheumatism the ratio is 54.44 per thousand, or less than one in every 18.

THE SURGEON-GENERAL'S DEPARTMENT.

The total amount of funds received by this department

for the year ending June 30, 1864, was..... \$12,263,988 08

The disbursements were..... 11,025,791 33

One hundred and eighty-two general hospitals, with a capacity of eighty-four thousand four hundred and seventy-two (84,472) beds, were in operation at the date of the last annual report. During the summer campaigns it was found necessary to establish additional ones, and increase the capacity of those nearest the scenes of active operations, giving one hundred and ninety (190) hospitals, with a capacity of one hundred and twenty thousand five hundred and twenty-one (120,521) beds, on the 30th June, 1864.

During the year the health of the entire Army was better than is usual with troops engaged so constantly on active duty and in arduous campaigns. No destructive epidemics prevailed in any section, and the number of sick and wounded, although large, has been comparatively small in the proportion it has borne to the whole Army. At the close of the year the number of sick and wounded, both with their commands and in general hospitals, was less than sixteen (16) per cent. of the strength of the Army. Of this number 9.3 per cent. were sick, and 6.46 per cent. wounded. The number sick with their respective commands was four per cent., and in general hospitals 6.3 per cent. of the strength. Of the 6.46 per cent. wounded, nearly one per cent. were with their respective commands, the rest in general hospitals.

The work of reducing the sick report of the Army has not advanced sufficiently to present a detailed statistical report of sickness and mortality during the year, but it is evident that the completed tables will exhibit a lower rate of mortality than in previous years. The deaths from disease during June, 1864, were 2.98 per thousand of mean strength; from wounds, 3.10 per thousand; total deaths 6.08 per thousand, or six-tenths of one per cent. for the month. During the same

month of the previous year the total was 7.3 per thousand of mean strength, or over seven-tenths of one per cent.

There were furnished during the year to disabled soldiers 660 legs and 339 arms.

The Army Medical Museum continues to increase in value, and is already one of the most instructive pathological collections in the world. A descriptive catalogue is in course of preparation, an examination of which will, it is thought, fully establish the importance of this institution in connection with the surgical and medical history of the war.

THE PAYMASTER-GENERAL'S DEPARTMENT.

The Paymaster-General's report is dated November 1st, 1864, and is for the year ending June 30th, 1864. General Brice says:—

The tabular statement herewith presented exhibits a balance in the hands of paymasters at the beginning of the fiscal year (July 1, 1863,) of \$60,685,584.28. This balance, with the requisitions of this office in favor of paymasters and sums received from other sources, amounting to \$246,796,281.64, leaves to be accounted for the total sum of \$313,484,655.87, which is done as follows, to wit:—

Payments to Regular Army.....	\$6,112,374 61
Payments to Military Academy.....	159,847 33
Payments to Volunteers.....	220,883,973 31
Amount of requisitions pending in the treasury, and not issued June 30, 1864.....	69,100,000 00
Actual balance in hands of paymasters on June 30, 1864.....	17,358,670 42

\$313,484,655 87

Of these pending requisitions there have, since June 30, 1864, been issued by the Treasury and disbursed to the Army the sum of \$68,100,000, leaving yet unissued the sum of \$1,000,000, for which requisitions were made before June 30 last.

ORDNANCE DEPARTMENT.

The amount of appropriations to the department were—\$16,473,092 12; the amount of expenditures were—\$58,502,822 99.

The following is a report of the ordnance, arms, and ammunition remaining in the arsenals on June 30, 1864:—

Field cannon and siege guns.....	2,063
Small arms.....	1,504,947
Pounds of artillery ammunition.....	1,831,583

QUARTERMASTER-GENERAL'S DEPARTMENT.

In this department during the past year accounts to the amount of \$284,809,697 72 have passed the official examination required by law, prior to the transmission to the Treasury for final examination and settlement. They number 7,913; 7,828 accounts remain on hand to be examined, relating to disbursements, amounting to \$221,339,560 48.

During the year preceding the last annual report from this office the accounts examined and transmitted to the Treasury covered disbursements to the amount of \$115,463,312 03.

There were in operation during the year 6,500 miles of military telegraph, of which 76 miles are submarine.

One-half of the above, or 3,000 miles, of which 38 were submarine, was constructed during the war.

About one thousand persons have been constantly employed in this service.

One million eight hundred thousand telegraphic messages were transmitted during the year.

The average cost of these messages, therefore, charging the whole yearly expense of construction, maintenance and operation to them, would be only thirty cents.

There has been purchased during the year about 9,500 army wagons, 1,100 ambulances, and harness for 175,000 animals.

The special reports of animals and means of transportation with the several Armies during the year are imperfect, and the accounts and returns of officers, which contain the exact information, have not yet received their final examination; but it is estimated that there are about 300,000 horses and mules in the service of the Army, of which the horses are about 170,000, and the mules about 130,000.

The reports received from Armies numbering 420,000 enlisted men, show that there were present with the Armies 221,069 animals; among which there are 113,684 serviceable horses, and 87,791 serviceable mules.

With the Armies there were present 17,478 Army wagons of the transport train, exclusive of ambulances and of the artillery carriages, caissons, limbers, &c.

There were purchased during the fiscal year ending June 30, 1864, 188,718 horses, 82,320 mules; and there were captured from the enemy in the same time, as reported, 20,808 horses, 9,013 mules.

During the first eight months of the year, 1864, the cavalry of the Army of the Potomac was supplied with two remounts, nearly 40,000 horses.

The charge of the National cemeteries and the burial of deceased soldiers, and others dying in the service of the United States in hospitals in and about Washington, is under the jurisdiction of this office, and is probably the most important of my specialties.

The following is the number of men who died in hospitals, in the vicinity of Washington, from August 1, 1861, to August 1, 1864:—

Cemetery.	White.	Black.
Old Soldiers' Home.....	5,447	629
Union.....	1,012	2,687
Harmony.....	473	2,687
New National, Arlington.....	2,619	281

8,559 4,169

The nativity of a portion of these is as follows:—United States, 4,910; England, 142; Ireland, 44; Scotland, 49; Wales, 7; France, 22; and Germany, 366.

THE LATE SURGEON WM. WHELAN, U. S. N.

ACTION OF MEDICAL OFFICERS IN BROOKLYN.

At a meeting of Medical Officers of the U. S. Navy, held at the U. S. Naval Hospital, Brooklyn, June 14th, 1865, to express their feelings on the occasion of the decease of Surgeon William Whelan, U. S. N., late chief of the Bureau of Medicine and Surgery; the following preamble and resolutions were submitted and passed:

Whereas, It has pleased Divine Providence to remove from his sphere of duty and usefulness, the late head of the Medical Corps of the U. S. Navy—therefore, be it

Resolved, That we take a sad pleasure in recognizing the eminent ability and worth, both public and private, which distinguished the character of the lamented deceased.

Resolved, That we sympathize most deeply and sincerely with his family and friends, feeling that our loss is only second to theirs.

Resolved, That a copy of these resolutions be transmitted to the family of the deceased.

R. F. BACON, Surgeon, U. S. N., Chairman.

C. EVERFIELD, Surgeon, U. S. N., Secretary.

ACTION OF MEDICAL OFFICERS IN PHILADELPHIA.

At a meeting of members of the Medical Corps of the Navy, held at the Navy Yard, Philadelphia, on Monday, June 19th, Surgeon Thomas Dillard was called to the chair, and Surgeon Philip Lansdale was appointed secretary.

The meeting was called to order by the chairman, and its object stated, viz: to give expression to the feeling of the Medical Corps of the Navy on the loss sustained in the recent death of Surgeon William Whelan, late chief of the Bureau of Medicine and Surgery.

On motion of Surgeon James M. Greene, it was

Resolved, That a committee of three be appointed by the chair to draft resolutions.

The chair appointed Surgeons Greene, Ruschenberger, and Shippen.

After a recess of half an hour, the committee reported the following resolutions, which were unanimously agreed to:

Resolved, That we sincerely sympathize with the family and relatives of the deceased in their bereavement, and that we offer them, under so melancholy a dispensation, our heartfelt regret and most sincere condolence.

Resolved, That in the death of Dr. Whelan the service has lost one of its best educated and zealous officers. It is surmised that his untiring industry, and unremitting attention to the duties of his office, laid the foundation of the painful disease which terminated his life.

Resolved, That in the opinion of this meeting, Dr. Whelan administered the affairs of the office with marked ability and impartiality, manifesting neither preference nor prejudice in the delicate duty of detailing officers for service.

U. S. ARMY AND NAVY JOURNAL.

NEW YORK, SATURDAY, JULY 1, 1865.

THE PERMANENT ARMY.

TWO methods of organizing the Army are possible. One is to retain to nearly or quite the number fixed upon as the basis of organization the Volunteers whose terms of service have not yet expired, and which, indeed, have just begun to run. The other is to discharge the Volunteer troops as fast as practicable, whether one year or three of service is yet due from them, and to expand the Regular Army to the size selected for the permanent establishment. The former plan is the more economical, because so many troops new in the field have had their expense of preparation already laid out—recruiting, mustering, transporting, equipping, clothing, payment of bounty for the entire period of service. It is safer, also, because these troops have been drilled and disciplined, are already veterans, are familiar with their duties, and habituated to their organizations. In case of sudden trouble, troops without these advantages would be inferior; and troops newly raised, even though individually old soldiers, would lose something in comparison with organizations for years in the field. Finally, this plan permits more deliberation upon the size of the permanent Army, because in one year from this we shall better know how many troops are needed for the guard and governance of the South, how many for frontier duty along Mexico and the Indian settlements, and how many for the contingencies of foreign troubles. The terms of the Volunteers would be expiring gradually, and they would be succeeded by the gradually increased Regular Army. We certainly shall require a less Army two years hence, unless new complications arise, than we do now.

But, on the other hand, there are several strong reasons for doing away with the present Volunteer Army as rapidly as possible. The first is founded in justice and in gratitude to the heroic soldiers who have saved the Nation and covered themselves and our arms with glory. Peace having come, our claims on them for a few more or less months of service should be given up cheerfully and gladly, as soon as public safety will permit. This is one way in which we can help to discharge that "only debt the Nation can never pay"—its debt of gratitude to its defenders. And, again, in any event, the organization of the Volunteers can last but a year or two, and the work will then have to be done again which we partly do now. It would be well to make the Army as permanent as possible at the start.

Which plan will be adopted, or whether, as is more likely, a combination may not be made of the two, can be inferred somewhat from the recent decided reductions and reorganizations of the Volunteer forces. It seems advisable that there should be an increase of our permanent Army to about one hundred thousand men. Our regiments of infantry should all be organized on the same footing. The regimental organizations of artillery might, perhaps, advantageously be broken up, and a Corps of Artillery formed. The new officers created by an increase of the Army should be filled by selection from the Regular and Volunteer forces. Items providing for these and similar changes should be inserted in the law increasing the Regular Army. We should be very glad to have members of the Military Committee in Congress get these and similar desirable changes through. On one or two points we will speak more particularly. Of all subjects in connection with the new Army, its size and the rule adopted for obtaining appointments therein are the most interesting to officers and the most universally discussed. Certain principles on the latter head appear to be founded in justice, and we will present them for consideration and discussion.

All vacancies arising in established regiments, staff corps, and departments, to and including the grade of colonel, should be filled by promotion according to seniority, except in case of disability or other incompetency. Promotion to and including the rank of captain should be made regimentally, and to the higher grades according to the arm of service, and in the Staff Departments, Engineers, and Ordnance according to corps.

Appointments to the rank of general officers should be made by selections from the Regular Army and

from Volunteers or Militia at the time being in the military service of the United States.

Vacancies in the lowest grade should be filled by the appointment of graduates of the Military Academy, and of such officers of Volunteers or Militia at the time in the military service of the United States, and such meritorious non-commissioned officers of the Army as shall have passed a satisfactory examination as to physical ability, moral character, attainments, and general fitness for the service before a competent Board. Much discussion, and much dissatisfaction, too, would inevitably take place with regard to the character, composition, and powers of such a Board. But, since it will be invested with extraordinary powers, and decide the fortunes of the applicants, it should consist of not less than three field officers of the Regular Army. The members of this Board should be designated by the Secretary of War.

Appointments in the lowest grade in the Adjutant-General's, Inspector-General's, Quartermaster's, and Subsistence Departments, and Signal Corps, should be made by selection from the line of the Army of the grade next below that to which such appointment would entitle the applicants. But officers thus transferred should, upon receiving their commissions, vacate their positions in the line. And all such transfers should be equalized as far as practicable among the several regiments, and, to this end, not more than one officer from any one regiment should be appointed in the same staff corps or department till an officer from a different regiment shall have received and accepted an appointment in that staff corps or department.

Having thus distinctly put forth some views on appointments and promotions, let us say a word or two with regard to the organization of the infantry and cavalry. Of the artillery we spoke above, intimating the opinion that the present regimental organization might be profitably exchanged for a corps organization. The infantry regiments should all be organized on the same footing. Perhaps something like the following might be adopted as the scheme for infantry and cavalry:—

INFANTRY.

The three-battalion organization, now existing in regiments numbered from 11 to 19 inclusive, to be broken up, and all infantry regiments to be organized as follows:—

1 colonel,	1 sergeant-major,
1 lieutenant-colonel,	1 quartermaster sergeant,
2 majors,	1 commissary sergeant,
1 adjutant (an extra lieut.),	1 hospital steward,
1 quartermaster and commissary (an extra lieut.),	2 principal musicians,

Band as now authorized by law for regular infantry.

Ten companies—each company to consist of

1 captain,	4 sergeants,
1 first lieutenant,	8 corporals,
1 second lieutenant,	2 musicians,
1 first sergeant,	1 wagoner,

And 64 privates, minimum; 82 privates, maximum.

If, on the contrary, Congress should see fit to give all the infantry regiments the three-battalion organization, the regimental adjutant and regimental quartermaster should be extra captains.

CAVALRY.

Each regiment to be organized as follows:—

1 colonel,	1 sergeant-major,
1 lieutenant-colonel,	1 quartermaster sergeant,
3 majors,	1 commissary sergeant,
1 adjutant (an extra lieut.),	2 hospital stewards,
1 quartermaster,	1 saddler-sergeant,
1 commissary,	1 chief trumpeter,
1 veterinary surgeon,	

Band as authorized by sec. 2, act of July 29, 1861, chapter 24.

Twelve troops of cavalry—each troop to consist of

1 captain,	5 sergeants,
1 first lieutenant,	8 corporals,
1 second lieutenant,	2 trumpeters,
1 first sergeant,	2 farriers or blacksmiths,
1 quartermaster sergeant,	1 saddler,
1 commissary sergeant,	1 wagoner,

And 60 privates, minimum; 78 privates, maximum.

On another occasion, we may resume the discussion of this interesting topic.

ENGLISH AND FRENCH IRON-CLADS.

FOREIGN military journals are full of accounts of the projected review of the combined iron-clad vessels of Great Britain and France, proposed by NAPOLEON and accepted by the Secretaries in England in behalf of her Majesty. It appears that the fleet is to skirt along the coast of France, steam through the English channel, and then make the tour of more or less of the coast of England, Scotland, Wales and Ireland.

All this promises to be the naval show of the season, in trans-Atlantic waters—the grandest display of years past, and perhaps of years to come. What is it for? To what end? The very construction of the iron-clads of either nation presupposes their sphere of operations to be directed exclusively against some

neighboring belligerent. No other nation of Europe or of the Eastern Hemisphere can compete with either of these in maritime warfare, or intends to attempt competing with them. Let Russia, or Denmark, or Italy go far with her experiments in iron-clad warfare, and these Western powers will go farther. Separated by a narrow channel only, the scientific or technical men of the two countries must already know the exact capabilities of each other's floating iron-forts, without this exhibition, and very little remains to be discovered by a trial-trip. This friendly competition, however, is certainly pleasant to contemplate, and suggests the near approach of Dr. CUMMINGS's millennium, when, if not the lion and the lamb, at all events the lion and the unicorn, will lie down together. British bull and French frog living in happier family ties than the nondescripts in BARNUM's cage, and neither bull raging to gore the frog nor Crapaud to swell to the bloated naval dimensions of John Bull—what a sentimental picture of the future!

A third power, the United States (or, shall we say, according to the London *Herald* and the *Standard*, the Disunited States) may possibly be the audience for whom this grand amiable show is designed, since the remainder of Europe is comparatively unmoved by the exhibition. As our country has lately made pretensions to possessing the strongest fleet on the globe; and as this same country has been ungenerously treated by England and France during the late Rebellion; and as these twin Powers have been filled with a solicitude which has not failed to find utterance through Parliament and Corps Legislatif, through platform and press, on the prospect of a war with America; and as our great disbanding Volunteer Army is popularly supposed to be indignant and angry at the kicks and insults it received from European Powers while engaged in too deadly a struggle to resent them; as, finally, Mexico and The States are *en delicatessen*, on the one hand, and Canada and The States on the other; both France and England may not think it amiss to make a wholesome display of their naval strength to this America, now rising, Antæus-like, from its rude prostration to the earth. Are we wrong in claiming that a seat has been reserved for us at the maritime performance, and that it is at least in part for our benefit that the spectacle takes place?

Possibly we shall not take to heart the lesson intended. This combined fleet is so vulnerable to the projectiles which have been in ordinary use for the last two or three years in our Navy, that we fear a reflection on the weakness, rather than on the strength, of the French and English marine, will be what is provoked by the display, on our side of the water. We imagine the consternation which a few *Kalamazoo*s and *Dictators* would cause in this whole fleet, should they steam through them, opening from their irresistible 15-inch guns. Where would be the *Gloires*, and *Magentas*, and *Solferinos*, of the French,—two-tiered boxes of guns, which may suit the fancy of XAVIER RAYMOND and the other *Revue des Deux Mondes* litterateurs, well enough, but are, after all, only the old line-of-battle ships a little conformed to what America has taught Europe must be conformed to, for the naval warfare of the future. The *Solferino* and *Magenta* (of which we have perfectly accurate drawings before us, as we write), and that list of ships which the French reviews from time to time publish, will doubtless appear—but they will strike no terror to an American, for he has constructed his theory of iron-clads from a different point of view. The English will parade their *Warrior*, *Black Prince*, *Minotaur*, *Agincourt*, *Northumberland*, and all that class of vessels. The hermaphrodite imitations of the American turret system, like the *Royal Sovereign*, will also appear. But the British experiments, tried so many years, of guns against targets (experiments which we have carefully studied from beginning to end and compared with our own), show that every one of the whole cluster of vessels, English and French, is vulnerable to our heavy shot. Their armor ranges from 4½ to 5½ inches of iron, with a backing of teak proportionate—10 to 20 inches. The ships average, probably, a degree of penetrability equal to the *Warrior*'s. Certainly it is not the fault of committees, and trials, and reports, if we are not yet surfeited with the accounts of the experiments of rifled guns against iron plates. We know all about this armament—how it has been shot through and through by the guns they brought to bear against it—guns much less powerful than we have had in actual practice for years.

We have heard how the armor has been punched, perforated, and cracked. We have learned from voluminous reports how one crack runs into another crack, how many shots went through target No. 5, and how many partially through armor No. 7. We know how much superior Mr. A's armor was to Mr. B's.

These ships can be riddled by our guns in ordinary use—the 15-inch gun, a cast smooth-bore gun, adopted for the exigencies of the war, and not designed to be the *ne plus ultra* of American ingenuity or handiwork. A few Monitors let loose in the fleet would make a "smash" like so many bulls in a china shop. Actual experiment with the 15-inch gun is the basis of our assertions. Have the Admiralty heard of the fight with the *Atlanta*? Has the French Minister of Marine heard of the riddling of the 6-inch French plates of PETIN and GAUDET, imported by us for target practice. The *Atlanta* was conquered with one shot. The PETIN and GAUDET plate was demolished with one shot. If such results are accomplished by the guns we have had for years, what would become of the fleet of the iron-clads, attacked by the wrought-iron guns we are now experimenting upon and building? We fear that "promenade," of which the papers speak, would become a hasty gallop.

Again, their guns—those in the English and French iron-clads—cannot pierce their own plates, even, though their shore target-guns do. Whatever guns they may have on shore, this fleet will probably show few guns, if a single one, above the old-fashioned English 68-pounder, an 8-inch smooth-bore, or the French 6 (or 6 4-10) inch rifled gun—about equal to a 32-pound rifled gun, and said to be capable of burning 27 pounds of powder. Hence, even if our Monitors were but as thickly clad as theirs, they could not penetrate us, while our 15-inch gun, with its 60 pounds of powder and its 435 pound shot, would go through their sides. In reality our heavy Monitors are of such enormous thickness that our own 15-inch guns will not penetrate them. Of course, the largest English or French cannon afloat, would be about as effective as a boy's potato-gun.

These iron-clads, soon to be exhibited, are, undoubtedly, not the best which either England or France can boast. The best ones are building. But even the best are not constructed on the right principle, except for fighting against a neighboring belligerent—in fact, against each other. They never could injure us. Should they be able to cross the ocean, they draw too much water to enter many of our harbors. The *Warrior*, for example, draws about 26½ feet. The Southern coast is protected by nature from such adversary. And, for Northern harbors, like New York and Boston, we have *Kalamazoo*s and *Dictators* enough to riddle and sink the intruders.

REAR-ADMIRAL S. F. DU PONT.

It is now some four years since we first met Rear-Admiral (then Captain) DU PONT on board the flag-ship *Wabash*, in the midst of those congenial spirits so closely identified with his career as the Flag Officer of the South Atlantic Squadron; he the central, conspicuous figure of them all; first, not alone in rank and position, but first, even among these, who seldom own a second, in all the distinguishing attributes of the gentleman. As such we first understood him, but when on the succeeding day we followed him in that bold and skilful attack upon the forts at Hilton Head, that gave us one of the first important naval victories of the late war, he stood revealed as the brave and accomplished sailor. And yet again, when a day or two later we saw him, with uncovered head, devoutly joining in the service for the dead, we knew him for the earnest Christian which he was. Thus was the circle of his character completed to the view as the bold and skilful sailor, the courteous gentleman, the sincere and consistent Christian. Such was DU PONT, and as such he stands approved, not to the world alone, but to those who knew him in the familiar and undisguised intercourse of friendship.

No man was more "popular" in the Navy; though his was not the popularity of good fellowship merely, but the tribute instinctively paid by all to a genuine manliness of character which none could question. Devoted to his profession; realizing in the exercise of its duties the spirit of its best traditions and examples; earnest with the ambition which it awakened; and yet ever subordinating that ambition to a lofty sense of patriotic obligation—DU PONT was indeed a

man over whose loss the American Navy may well mourn. His history was almost the history of the service itself. Identified with it for nearly a full half century, he had watched its growth and transitions, from the period of sails and seamanship, at the close of the war of 1812, to this era of steam and iron armor; from the old-fashioned fighting days of yard arm to yard arm, to the age of rifled guns and 15-inch smooth-bores. With judgment matured and disciplined by so long an experience in the vicissitudes of experiment and change, it was not to be expected that he should be found leading the van in the revolutionary movements of modern naval science; yet it will be hard to prove him unduly backward in availing himself of the results of modern invention, when we consider how little beyond what he saw and acknowledged has been thus far established by experience and experiment.

DU PONT's first introduction to the Navy was as midshipman, appointed by President MADISON, on the 19th of December, 1815. He was born at Bergen Point, New Jersey, September 27, 1803, and was christened SAMUEL FRANCIS. He was of French origin on his father's side, his grandfather being P. S. DUPONT DE NEMOURS, the intimate personal friend of both MADISON and JEFFERSON. At the time of his appointment to the Navy, he was offered the option of a cadetship at West Point, but preferred the Navy, to which he was appointed from Delaware, of which State he became a resident in his boyhood. His first cruise of three years was commenced in the *Franklin*, 74, Commodore STEWART, from which he was transferred to the sloop-of-war *Erie*, Captain BALLARD, and afterwards Lieutenant-Commanding STOCKTON. His second cruise was on the Mediterranean station, in the frigate *Constitution*, Commodore JACOB JONES, and he subsequently returned to the Mediterranean in the *North Carolina*, 74, Commodore JOHN RODGERS; and again for a three years cruise in the sloop-of-war *Ontario*, Captain STEVENS. Meanwhile he had served on the West India station and the coast of Brazil in the frigate *Congress*, Commodore BIDDLE, and had been promoted to be sailing-master of the *North Carolina*, and in 1826 commissioned as lieutenant, and ordered to the schooner *Porpoise*, Lieutenant-Commanding BENJAMIN COOPER.

In 1835 he was ordered to the *Warren*, sloop-of-war, Captain WILLIAM TAYLOR, where he served as Executive Officer during the Florida war. He was next ordered to the *Constellation*, as Executive Officer under Commodore DALLAS, who appointed him to his first independent command, the schooner *Grampus*, from which he was immediately after transferred to the command of the sloop-of-war *Warren*, cruising in the Gulf of Mexico. From 1838 to 1842 he served in the *Ohio*, line of battle ship, bearing the flag of Commodore HULL, and commanded by Captain, now the venerable Rear-Admiral SMITH, and Captain LAVALETTE. In 1845 he was ordered to the command of the *Congress*, frigate, bearing the flag of Commodore STOCKTON, and in 1846 to the command of the corvette *Cyane*. The outbreak of the Mexican war brought his services into request, and gave him the first opportunity for acquiring distinction. In the *Cyane* he captured San Diego, and landed JOHN C. FREMONT. He cleared the Gulf of California of Mexican vessels, capturing and destroying thirty. He took possession of La Paz, the capital of Lower California, spiked the guns of San Blas, and established the blockade of Mazatlan, which latter port he subsequently assisted in capturing, leading the line of boats which entered the main harbor under the orders of Commodore, now Rear-Admiral SHUBRICK, in November, 1847. He was next despatched in the *Cyane* to defend Lower California against the Indians and Mexicans. He covered La Paz until it could be fortified, landed at San Jose with a force of one hundred marines and sailors, defeated and scattered a force of Mexicans largely superior, and rescued a small party under Lieutenant HEYWOOD, who were beleaguered in the Mission House. He led or took part in a number of expeditions into the interior, capturing many prisoners, and cooperating with Colonel BURTON and Lieutenant, now Major-General, HALLECK, approaching from the North, scattered the Mexicans and Indians, and gained complete possession of the peninsula of California.

The war being over, in 1848 DU PONT returned to

Norfolk in the *Cyane*, from an absence of three years. After a service of forty years, sixteen as lieutenant and thirteen as commander, he was made a captain in 1855. In 1857 he was ordered to the command of the *Minnesota*, frigate, and sent on a special service to China, with W. B. REED, Minister to that empire. There he was a witness to the naval operations of the English and French in the Chinese waters. After a cruise of two years, during which he visited Japan, Western India, and Arabia, he returned in June, 1859, with the *Minnesota* to Boston. On the 1st of January, 1861, he was appointed to the command of the Philadelphia Navy Yard, relieving Commodore STEWART. Here he was at the breaking out of the war, and by his promptitude and experience rendered great service in securing Washington. In June, 1861, he was made President of a Board called at Washington to establish a plan of naval operations, from the study of the records of the coast survey and other data.

On the division of the Atlantic Squadron into two distinct commands, in September, 1861, Captain DU PONT was appointed to the command of the South Atlantic Squadron, where he remained until his recall on the 3d of June, 1863. Auspiciously commencing his career by the brilliant capture of Forts Beauregard and Walker, defending Port Royal harbor, he rendered essential service in the establishment of the blockade of the coast of Carolina and Georgia; in the occupation of Tybee Roads and Tybee Island, which gave the Army their base for the reduction of Fort Roanoke; in the expedition for the destruction of the batteries on the mainland at Port Royal Ferry; in the capture in March, 1862, of Cumberland Island and Sound, Amelia Island, the river and town of St. Mary's, Ga., Fernandina, Fla., and Fort Clinch.

The inlets along the coast were also occupied or carefully examined, the rivers ascended, Jacksonville and St. Augustine, Florida, taken, and the yacht *America* which had been sunk was raised. At Charleston alone was the blockade ineffective, the force at command not being sufficient to cover completely the circuit from Bay to Stono, and the demands upon the navy rendering the reinforcement of the squadron impossible. The capture of Charleston, it was hoped, would complete the blockade, and an attack on that place was ordered but not until it had been unfortunately delayed until the enemy had thorough warning and opportunity for preparation. The history of the unsuccessful operations for the reduction of that place has already been fully written. That they did not succeed cannot be laid to the charge of DU PONT, and where he failed none other followed with success.

On the 16th of July, 1862, during his command of the South Atlantic squadron, Captain DU PONT was made a Rear-Admiral, standing second on the list. In addition to the twenty-three years and seven months of sea service which we have recorded, he rendered important service while on shore duty for nine years and three months, on boards, commissions, courts martial, and courts of inquiry. He assisted in the first organization of the Naval Academy; was a member of the commission to examine into our light-house establishment, and subsequently a member of the Light-house Board. He twice assisted in revising the rules and regulations of the Navy; was a member of the Naval Retiring Board, and contributed at various times important papers on subjects relating to the interests of the naval service. His valuable paper on coast defences was exhumed from among congressional documents, and published in a more accessible form by officers of Engineers and others interested in the subject.

Such, in brief, is the history of the services, extending over half a century, rendered by Rear-Admiral DU PONT to his country and his profession. In its sudden stroke death has overtaken him, who was ever prepared, as he could wish it might, in the full possession of his faculties and his strength. Not soon will his country forget his great services; nor will those who have known and honored him lose the memory or the influence of his high character and his noble spirit. It is the lives of such men that dignify the profession of arms and interpret the high mission it fulfils both in peace and in war. No vulgar ambition for mere success was his, but that lofty purpose which demands success as the reward of faithful and conscientious service. And such was his just and honorable reward.

ARMY GAZETTE.

GENERAL J. W. GEARY'S FAREWELL TO HIS TROOPS.

HEADQUARTERS, SECOND DIVISION, TWENTIETH CORPS,
NEAR BLADENSBURG, MD., June 6, 1865.

General Orders No. 25.

The time for the dissolution of this division is now at hand. Before we separate from that organization, under whose guiding star most of us have marched and fought for years, your general feels it right and just to address you a parting word.

It may safely be asserted that no organization in any army has a prouder record, or has passed through more arduous, varied and bloody campaigns.

To be assured of this, we have but to enumerate the battles in which all, or many of us, have participated:—Rich Mountain, Garretts Ford, Winchester, Fort Republic, Bolivar, Cedar Mountain, Second Bull Run, Antietam, Chancellorsville, Gettysburg, Wauhatchie, Lookout Mountain, Missionary Ridge, Kingold, Skull Creek Gap, Resaca, New Hope Church, Pine Hill, Muddy Creek, Noe's Creek, Kolb's Farm, Kenesaw, Peach Tree Creek, Atlanta, Savannah, and the labors, exposures and dangers of the Georgia and Carolina campaigns are lettered on your banners; while the part you have bravely borne in scores of actions, small of note in this war, but equal to battles in other days, is attended by hundreds of scars on your own persons, and by the remembrance of our heroic dead throughout Virginia, Maryland, Pennsylvania, Tennessee, Georgia, Alabama and North and South Carolina.

Veterans, truly, all of you; men of whom your country is proud, and who are no prouder than ever of your country. Your children, grand children, and great grand children will have passed away long before your heroic deeds shall have been forgotten, or the memories of that great struggle throughout which we have stood shoulder to shoulder, and swept from the Atlantic to the Mississippi, and back again to the Atlantic, shall cease to nerve our descendants to noble deeds and brave actions. Your country has been saved, and yours is no small share in the glorious right to be proud of the result.

A few months or years hence, and those of us who survive will again be citizens of the noblest, proudest and freest nation on the globe. Noble, because her nobility is her common people, who saved her in the years of peril; free, because truth, liberty, and prevailing by God's national purifier, the sword, has made her free; proud, because unaided and uncountenanced by other nations, she has demonstrated to the world that the people who educate all their youth and make all their laws can, with the strong arms of their educated youth enforce their laws, maintain their integrity, and pay their debts.

Be justly proud of our common record and of our common country.

Cherish with the memories of the banner under which you gloriously fought and won the victory, the badge of our Union, the spotless star—emblem of hope and glory. May the memory of our fallen heroes, stricken down by thousands at our side, in low our parting and consecrate our devotion to our God, our country and each other.

By command of Brevet Major-General JOHN W. GEARY.
W. F. VOORHEES, A. A. G.

RIGHTS OF DISMISSED OFFICERS.

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE,
WASHINGTON, June 10, 1865.

General Orders No. 112.

Right of Officers summarily dismissed to demand a trial by Court-Martial.

I. The following section of the act of Congress, approved March 3, 1855, chapter 73, is published for the information of all concerned:

Sec. 12. And be it further enacted, That in case any officer of the military or naval service who may be heretofore dismissed by authority of the President, shall make an application in writing for a trial, setting forth under oath that he has been wrongfully and unjustly dismissed, the President shall, as soon as the necessities of the public service may permit, convene a court-martial to try such officer on the charges on which he was dismissed. And if such court-martial shall not award dismissal or death as the punishment of such officer, the order of dismissal shall be void. And if the court-martial award dismissal shall not be convened for the trial of such officer within six months from the presentation of his application for trial, the sentence of dismissal shall be void.

II. The following regulations for carrying into effect the foregoing provisions are promulgated, and will be complied with in all cases:

1. Army, Department, or Division commanders, forwarding recommendations for summary dismissal, will transmit, accompanying the same, charges and specifications, appropriate to the offences imputed, properly framed, and supported by affidavits or official reports, with the names of the witnesses by whom all material allegations can be substantiated.

2. Applications for trial under this act must be made as soon as practicable after receipt of notice of dismissal, setting forth under oath facts showing the error or injustice complained of, and must be addressed to the Adjutant-General of the Army.

3. Should there be no general court-martial, appointed by direction of the President, then in session at a convenient point, one will be convened within the department or corps wherein the accused last served, unless the latter shall have suggested sufficient reasons for causing the trial to be elsewhere held.

4. The trial will proceed in the usual manner, upon the charges originally forwarded; and, should the President revoke the order of dismissal before arraignment of the accused, he may also be tried upon such additional charges as may be properly preferred.

5. Should the court award any other punishment than death or dismissal, such sentence will, if approved by the President, be duly executed.

By order of the Secretary of War:
K. D. TOWNSEND, Assistant Adjutant-General.

THE MILITARY DIVISION OF THE TENNESSEE.

MAJOR-GENERAL THOMAS ASSUMES COMMAND.

HEADQUARTERS, MILITARY DIVISION OF THE TENNESSEE,
NASHVILLE, TENN., June 10, 1865.

General Orders No. 1.

By order of the President of the United States, I hereby assume command of the Military Division of the Tennessee, embracing the Department of Kentucky, Department of Alabama and Department of Florida, with headquarters at Nashville. The Department of Kentucky embraces the State of Kentucky. Major-General J. M. Palmer, United States Volunteers, is assigned to its command, with headquarters at Louisville. The Department of Tennessee embraces the State of Tennessee. Major-General George Stoneman to command, with headquarters at Knoxville. The Department of Georgia embraces the State of Georgia. Major-General J. B. Smedman to command, with headquarters at Augusta. The Department of Alabama embraces the State of Alabama. Major-General C. R. Woods to command, with headquarters at Mobile. The Department of Florida embraces the State of Florida and District of Key West. Major-General A. A. Humphrey to command with headquarters at Tallahassee.
Geo. H. THOMAS,
Major-General, United States Army.

THE DEFENCES OF WASHINGTON.

HEADQUARTERS DEPARTMENT OF WASHINGTON,
TWENTY-SECOND ARMY CORPS, June 23, 1865.

Under instructions contained in Special Orders No. 315, current series, War Department, Adjutant-General's Office of June 19th, 1865, the following field works are announced as composing the defences of Washington:

North of Potomac—Fort Carroll, Fort Stanton, Fort Baker, Fort Mahan, Fort Lincoln, Fort Totten, Fort Slocum, Fort Stevens, Fort Reno, Fort Sumner and Fort Foote.

South of Potomac—Fort Lyon and Redoubts Weed, Farnsworth and O'Rourke; Fort Ellsworth, Fort Worth, Fort Ward, Fort Richardson, Fort McPherson, Fort Whipple, Fort Morton, Fort C. F. Smith, Fort Ethan Allen and Battery Rodgers. All other Forts, Batteries and Block Houses of the defences of Washington will be at once dismantled excepting Fort Tillinghast and Fort Craig, which will be maintained until

Fort McPherson, immediately in rear of the positions occupied by them, is so far completed as to receive its armament.

Under instructions to be issued through the Chief of Artillery of the Department, and Chief Engineer of the Defences, Division Commanders will dispose of all ordnance and ordnance stores belonging to the Forts to be dismantled, and make the necessary changes in the armament of the works to be retained.

Fort Greble (North of Potomac), and Fort Cocoran (South of Potomac), will be used temporarily for the storage of such ordnance and ordnance stores as the Chief of Ordnance may designate.

As soon as the artillery, ammunition, and other stores are removed from any fort, battery, or block house, the garrison thereof will be withdrawn, and only sufficient guard left to protect the property. This guard will remain until further orders from these headquarters.

Such property and material belonging to the Engineer Department within the forts to be dismantled as in the opinion of the Chief Engineer of the Defences may be needed for the completion of the fort to be retained, or is of such a nature as would render it liable to injury, or to be stolen, will be at once removed to the works where needed, or turned into the nearest engineer depot.

The Chief of Artillery and the Chief Engineer of the Defences will render with as little delay as practicable to these headquarters, reports of their action taken under the provisions of this order, and schedule exhibiting proper strength of garrison for each work to be retained.

The Chief Quartermaster, Department of Washington, will furnish the necessary transportation for execution of this order.

By command of Major-General PARKER.
J. H. TAYLOR, Chief of Staff, A. A. G.

DISMISSALS.

For the week ending June 17, 1865.

Captain Edward L. Whitney, Commissary of Subsistence, United States Volunteers, to date June 10, 1865.

Captain Ira G. Robertson, 16th Kansas Cavalry, to date June 13, 1865, for defrauding recruits enlisted for the 13th Kansas Volunteers of their local bounties.

Captain Stephen H. Edgett, 2d Pennsylvania Cavalry, to date June 14, 1865, for absence without leave, disobedience of orders, and breach of arrest.

First Lieutenant George W. Row, 1st Arkansas Cavalry, to date June 10, 1865, for habitual drunkenness, disobedience of orders, and for using disrespectful language and violence towards his superior officer.

First Lieutenant James E. Speake, Adjutant 148th Indiana Volunteers, to date June 12, 1865, for desertion while under arrest awaiting trial upon charge of conduct unbecoming and officer and a gentleman.

Lieutenant William Devere, 35th New Jersey Volunteers, to date June 9, 1865, for fraudulently obtaining transportation, by inserting in an order for the same issued to him the words "and two men."

DISMISSAL AMENDED.

The order heretofore issued dismissing First Lieutenant Conrad Leek, 14th Illinois Volunteers, has been so amended as to read, First Lieutenant Conrad Leek, 14th Illinois Volunteers.

DISHONORABLE DISCHARGE CONFIRMED.

The order heretofore issued, dishonorably discharging Captain Michael Auer, company A, 15th New York Cavalry, has been confirmed, to date May 25, 1864, for allowing a reserve picket guard under his command to be disgracefully surprised and captured without firing a shot.

SENTENCE REMITTED.

The unexecuted portion of the sentence of a General Court-Martial in the case of Assistant Surgeon James A. Martin, 46th United States Colored Infantry, has been remitted, and he has been discharged the service of the United States, to take effect January 14, 1865.

DISMISSALS REVOKED.

The orders of dismissal heretofore issued in the following cases, have been revoked:

Lieutenant-Colonel William Ball, 12th Pennsylvania Cavalry, and he has been honorably discharged as of the date of the order of dismissal.

First Lieutenant Oscar Rahn, 184th Pennsylvania Volunteers, and he has been honorably discharged as of the date of the order of dismissal.

First Lieutenant Robert M. Reed, 33d Missouri Volunteers, and he has been honorably discharged as of the date of the order of dismissal.

Second Lieutenant Samuel P. Gamble, 63d Pennsylvania Volunteers, and he has been honorably discharged.

RESTORED TO COMMISSION.

The order heretofore issued dismissing Captain Richard E. Corson, Assistant Quartermaster, United States Volunteers, has been revoked, and he is restored to his former position in the service.

The order heretofore issued dismissing Captain Robert T. Dunham, Assistant Adjutant-General United States Volunteers, has been revoked, and he is restored to his former rank and position in the service.

DISABILITY REMOVED.

The disability to reëter the service of the United States, resulting from the dismissal therefrom in the case of First Lieutenant George T. Dudley, 5th New York Volunteer Engineers, has been removed.

NOTICE TO DELINQUENTS.

The following officers, having been reported at the headquarters of the Army for the offences hereinafter specified, are hereby notified that they will stand dismissed the service of the United States unless within fifteen (15) days from June 19, 1865, they appear before the Military Commission in session in Washington, D. C., of which Brigadier-General John C. Caldwell, United States Volunteers, is President, and make satisfactory defence to the charges against them:

Absence without leave.

Captain Simon Knoblock, 1st Maryland Volunteers.

First Lieutenant A. P. Day, 15th Connecticut Volunteers.

First Lieutenant Augustus H. Wright, 24th United States Colored Troops.

Second Lieutenant John E. Vink, 1st Maryland Volunteers.

Second Lieutenant Francis McFall, 28th Pennsylvania Volunteers.

Second Lieutenant Fred. W. Back, 1st United States Colored Troops.

The following officers having been reported at the Headquarters of the Army for the offences hereinafter specified, are hereby notified that they will stand dismissed the service of the United States, unless within fifteen days from June 23 they appear before the Military Commission in session in Washington, D. C., of which Brigadier-General John C. Caldwell, United States Volunteers, is President, and make satisfactory defence to the charges against them:—

Absence without leave.

Captain Robert Thwaites, 88th Pennsylvania Volunteers.

First Lieutenant George F. Roberts, 99th Pennsylvania Volunteers.

First Lieutenant Thomas H. Rockwell, 3d New York Volunteers.

Assistant Surgeon Delon H. Abbott, 9th Maine Volunteers.

WAR DEPARTMENT, WASHINGTON, June 23—3:40 P. M.

Major-General JOHN A. DIX, New York:

The Navy Department has just received official dispatches from Admiral Thatcher, dated at Galveston, June 8, reporting that on the 1st of this month, General Brown, commanding the United States forces, occupied and garrisoned Brownsville. On the 2d of June, the Rebel General Kirby Smith and Magruder met, in the harbor of Galveston, General A. J. Smith, representing Major-General Canby, and General Kirby Smith then and there signed the terms of surrender previously agreed upon at New Orleans.

On the 5th of June, full and formal possession of Galveston was delivered up to the United States forces, and the flag of the Union raised. On the 6th of June, Admiral Thatcher went ashore and was cordially received by the Rebel naval and military authorities, who requested a part of the United States Naval force to remain there for their protection. Galveston is before this time strongly garrisoned by United States land forces, sent forward by General Canby. General Sheridan is also probably there in position.

The President's proclamation raising the blockade will be immediately issued.

WINN M. STANTON, Secretary of War.

NAVY GAZETTE.

THE DEATH OF REAR-ADMIRAL DUPONT.

NAVY DEPARTMENT, WASHINGTON, June 23, 1865.

General Orders No. 60.

The Department announces to the Navy and to the Marine Corps, the death, this morning, at Philadelphia, of Rear-Admiral Samuel F. DuPont, United States Navy, after an honorable career of nearly fifty years in the service of his country.

This officer was distinguished for ability and acquirements in his profession, and filled with credit many important positions, both ashore and afloat. He was especially distinguished for his decisive and splendid victory achieved at Port Royal, S. C., on the 7th November, 1861, for which he received the thanks of Congress.

As a recognition of his distinguished services, and a mark of respect to his memory, it is hereby directed that at the Navy Yard, Philadelphia, the flag will be hoisted at half-mast to-morrow, and continue so until sunset of the day of his burial, on which day, at noon, thirteen minute guns will be fired, and, at all other Navy Yards, the flag will be hoisted half-mast on and throughout the day after the receipt of this order, and thirteen minute guns fired at noon.

GIDRON WELLES, Secretary of the Navy.

ADMIRAL THATCHER'S REPORT.

WEST GULF SQUADRON.
UNITED STATES FLAGSHIP, U. S. CUTLER,
OFF GALVESTON, TEXAS, June 8, 1865.

SIR:—In my dispatch, No. 138, written at Mobile, I informed the Department that the Rebel Commissioners at Galveston had desired transportation to New Orleans, to meet General Canby, with a view to arrange the terms of surrender, and that I had directed such transportation to be furnished. On the evening of the 28th of May, I arrived at New Orleans, where I remained until the morning of the 5th inst., and, during that period, had several official interviews with Colonel Ashb- Smith, the commander of the defences of Galveston, who assured me that there would be no opposition on the part of the forces under his command or the people to the occupation of Galveston by the Navy. On the morning of the 5th, I left New Orleans in the United States steamer *R. R. Cypher*, and arrived off Galveston yesterday, at 2 P. M. Captain Sands then informed me that on the 2d inst., Major-General E. Kirby Smith and Major-General J. R. Magruder came on board the United States steamer *Port Jackson*, where they were met by Brigadier-General E. J. Davis, representing E. R. S. Canby, and the terms of surrender heretofore agreed upon between the representatives of General Smith and Canby were signed by General E. Kirby Smith. After signing of the articles of surrender, Captain Sands immediately took the necessary steps to buoy out the channels, and on the 13th inst., proceeded inside the bar in the *Cornelia*, followed by the *Preston*, and landed at Galveston, accompanied by Commander Stevens, Commander D. W. and Lieutenant-Commander Wilson, and had an interview with the Mayor, C. H. Leonard; after which the flag of the United States was raised on the Custom-House, the citizens conducting themselves in the most orderly manner. The flag is now floating on all the forts in the harbor; but as we have not sufficient force from the fleet to garrison the latter, I have decided the light-draft gunboats *Cornelia*, *Preston*, and *New London* to remain inside the bar, where they will soon be joined by the *Port Royal*. I have also given order to Commander Le Roy, of the *Osage*, to convey with his vessel the troops which General Canby, it is hoped, will in a few days be ready to dispatch to occupy the different ports on the coast already surrendered to the United States. General Brown, of the United States Army, on the 1st inst., with a brigade, took possession of the garrison at Brownsville. The other ports on the coast of Texas, which have been heretofore blockaded by our vessels, are now held by the Naval forces. Thus blockade-running from Galveston and the coast of Texas is at an end. To-day I went on shore and had an interview with the civil and military authorities, by whom I was cordially received, and, in conversation, these gentlemen expressed their anxiety for the restoration of the old order of things, and reiterated their desire that a portion of our Naval force should remain in the harbor for their protection. On the visit, I was accompanied by Captain Sands and a part of my staff.

Very respectfully, your obedient servant,
H. K. THATCHER, Acting Rear-Admiral,
Commanding the Western Gulf Squadron.
ROD. GIDRON WELLES, Secretary of the Navy, Washington, D. C.
P. S.—The *R. R. Cypher* will now proceed to New York, in obedience to the orders of the Department.

REGULAR NAVAL SERVICE.

ORDERED.

JUNE 19.—Sailmaker Thomas O. Fassett, to assist in taking an inventory of the Storekeeper's property at the Portsmouth Navy Yard.

Second Assistant Engineer Herman A. Deltus, to the *Wyck*.

JUNE 20.—Lieutenant Alfred T. Mahan, to the Naval Asylum, Philadelphia, for his examination.

Second Assistant Engineers John Borthwick, Harvey Barrett and H. D. Sellman, to the *Shamokin*.

Lieutenant Edwin M. Shepard, to the *Vanderbilt*.

Passed Assistant Surgeon A. S. Oberly, to duty at the Naval Hospital, New York City.

Captain William M. Walker, to duty with Rear-Admiral Gregory.

JUNE 21.—Second Assistant Engineer John T. Hawkins, to special duty at the Novelty Iron Works, New York.

First Assistant Engineer Fletcher A. Wilson, to the *Hartford*.

First Assistant Engineer G. L. M. McCarty, to special duty at New York.

Surgeon John Thornley, to temporary duty at the Marine Rendezvous, No. 18 Bowery, New York City, during the absence of Surgeon Henry O. Mayo, and on his return to regard himself as waiting orders.

Lieutenant-Commander Chester Hatfield, to the receiving ship *Vermont*.

JUNE 22.—Assistant Surgeon F. W. Wunderlick, to New York for passage to obey his previous orders to the West Gulf Squadron.

Lieutenant-Commander T. Scott Filibrown, to duty at the Naval Observatory, Washington, D. C.

Second Assistant Engineer James L. Vanclain, to the *Chickopee*.

 Morris Fitzgerald, landsman, January 21, Hospital ship *Fitch*.
 Ira Lewis, landsman, February 7, Hospital ship *Fitch*.
 John C. Edwards, landsman, February 13, Hospital ship *Fitch*.
 John Inglehart, landsman, February 16, Hospital ship *Fitch*.
 John H. Garvin, landsman, February 17, Hospital ship *Fitch*.
 Levi Smith, landsman, February 22, Hospital ship *Fitch*.
 Orien B. Fatchen, landsman, May 1, Naval Hospital, St. Helena Island, S. C.
 George W. Brandle (colored), landsman, March 16, Naval Hospital, St. Helena Island, S. C.
 Andrew Jackson (colored), landsman, April 1, Naval Hospital, St. Helena Island, S. C.
 Thomas Brown, seaman, May 3, U. S. steamer *Glide*, Berwick Bay.
 James Cunningham, landsman, March 28, U. S. steamer *Jonquille*, Charleston, S. C.
 Edwin R. Counce, paymaster's steward, May 13, U. S. steamer *John Adams*.
 William Goldsboro, landsman, May 16, Bay Point, S. C.
 James Burket, seaman, April 11, U. S. steamer *Calypso*.
 William Russell, seaman, May 31, Naval Hospital, New York.
 William Williams (colored), landsman, June 4, receiving ship *Alleghany*.
 Gilford Kimberly, fireman, May 19, Hospital barge *Mound City*.
 Edward Donaly, seaman, June 7, Naval Asylum.
 Levi Miller, quartermaster, November 4, 1864, U. S. steamer *Key West*.
 William Horne, marine, May 21, Armory square Hospital, Washington city.
 Jacob Nixon, first-class boy, May 28, Naval Hospital, Chelsea.
 Francis G. Adams, acting ensign, May 22, U. S. steamer *Honduras*.
 Henry Luther, landsman, June 8, Naval Hospital, Chelsea.
 Henry Walden (colored), first-class boy, Naval Hospital, Wilmington, N. C.
 William Witmer, second-class fireman, April 17, Naval Hospital, New Orleans.
 Alfred Washburn, acting master, May 14, Naval Hospital, New Orleans.
 Peter Viel, coal-heaver, May 12, Naval Hospital, New Orleans.
 Dennis Condren, cabin steward, May 6, Naval Hospital, New Orleans.
 George Creighton, landsman, April 15, U. S. steamer *Sciota*.
 Thomas Cooper, ordinary seaman, April 25, U. S. steamer *Meteor*.
 John Underwood, pensioner, June 11, Naval Asylum, Philadelphia.
 Lorenzo Chase (colored), landsman, April 19, U. S. steamer *New Hampshire*.

Joseph Winning (colored), landsman, May 28, U. S. steamer *New Hampshire*.
 Charles Tugol (colored), landsman, May 7, U. S. steamer *New Hampshire*.
 James Finnegan, landsman, April 14, U. S. steamer *New Hampshire*.
 George Vaught (colored), landsman, May 12, U. S. steamer *New Hampshire*.
 Scipio Heel (colored), landsman, May 12, U. S. steamer *New Hampshire*.
 John Smith, boatswain's mate, April 27, U. S. schooner *C. P. Williams*.
 Charles Green, seaman, May 23, receiving ship *Vermont*.
 John Lucius, seaman, May 19, Naval Hospital, New York.
 Henry Turner, ordinary seaman, May 25, U. S. steamer *Monadnock*.
 John Sharp, landsman, May 22, U. S. steamer *Whitehead*.
 Richard Gee, first-class boy, April 19, U. S. steamer *Virginia*.
 Thomas Param, captain's steward, May 13, U. S. steamer *Penobscot*.
 Joshua Ricks (colored), first-class boy, May 22, U. S. steamer *Genesee*.
 Luke Robbins, seaman, May 24, U. S. steamer *Seminole*.

NAVAL REGISTER.

The Editor will be glad to receive for this department of the JOURNAL all interesting facts in relation to vessels of the Navy suitable for publication.

ARKANSAS, purchased vessel, screw, 6, sailed North for Fort Monroe, N. H., on or about June 12, 1865. She will stop at Fortress Monroe.

ANTONA, screw, 6, from Galveston, arrived at New Orleans on the 13th ult. She was formerly a prize.

ARMISTEAD, paddle-wheel, 10, was reported at St. John, N. B., June 8. She has been in commission since 1862. She was on duty a while on the James River, was engaged in the attack on Fort Fisher, and in the subsequent actions reducing the forts on Cape Fear River. Since February 22d, she has been doing guard duty at Wilmington. Lieutenant-Commander, George W. Young; Acting Masters, Dudley E. Taylor, James B. Wood, Jr.; Acting Assistant Surgeon, Henry Shaw; Acting Assistant Paymaster, Theodore Parker; Acting Ensigns, Henry H. Collamore, Joseph W. Crowell, Elias Lawson; Engineers—Second Assistants, W. B. Kilpatrick, Robert L. Webb; Third Assistants, Gustavus A. Peltz, Edward J. Gillespie, John L. Starky; Mates, C. H. Crossman, Edward W. Fitzell, H. M. Wadsworth.

CONSTELLATION, sloop-of-war, 24, now lying at Portsmouth Navy Yard, is being prepared for use as a schoolship.

COLORADO, screw, 52, sailed Wednesday, June 21, at 4 o'clock, bearing Rear-Admiral Goldsborough to his command in European waters. The Colorado was accompanied by the *Frolic*, formerly the blockade-runner Advance, and will be followed in a few days by other vessels of the special squadron. The Niagara and other vessels of the squadron are already in European waters.

CANONICAL, iron-clad, 2, arrived at Philadelphia June 25, from Port Royal, S. C. Beside other engagements since the date of her launch, April 16, 1864, at Boston, she took part in the Fort Fisher bombardment; she was also at the taking of Charleston, S. C., and was last heard of at Havana. Lieutenant-Commander, George E. Belknap; Lieutenant, H. D. Manley; Assistant Surgeon, H. N. Beaumont; Acting Assistant Paymaster, M. T. Trampbour; Acting Masters, D. S. Murphy, R. E. Anson; Acting Ensign, F. P. Center; Engineers—Chief, D. B. Maccomb; First Assistant, C. G. Conklin; Second Assistants, F. G. McKean, J. W. Saville; Third Assistants, Wm. Keenan, J. W. Chandler, G. W. Hughes.

CONNECTICUT, paddle-wheel, 11, arrived at Philadelphia on the afternoon of the 23d, four days from Port Royal, having the Monitor Casconius in tow. For the last four months, the Connecticut has been doing special duty at the West Indies. She reports that in all but the English islands she was treated with respect and courtesy. On arriving at St. George's, Bermuda, February 24, the pilot showed Captain Boggs a circular from her Majesty, ordering all Rebel or Federal men-of-war to anchor under the guns of the fort. The Captain, however, chose to let go his anchor beyond range of the fort, and next morning a little gunboat came up and requested him to go down and call on the Governor. On arriving at his mansion, he immediately took the Captain to task for having disobeyed his orders, and asked him if he did not see the circular from the Queen. "Yes," replied Captain Boggs; "I saw a circular from you, directing that all Federal or Confederate vessels-of-war should be anchored in a certain spot, but as I am in command of neither of them, I took the liberty to use my own discretion." A look of amazement overspread the Governor's face as he asked, "What do you command?" "I have the honor to command a United States man-of-war," replied the Captain. He was not at all willing to have Englishmen or any foreign nation designate him by a term that would indicate the dissolution of the Union. At Barbadoes also they refused to allow the Connecticut to remain longer at anchor than twenty-four hours—even after the Captain had asked permission to do so, to make some necessary repairs—unless he would give the Governor "a distinct assurance of his utter inability to proceed to sea." What made it still more insulting was the fact that only a short time ago the Alabama put in there, and asked to remain a day and for twenty-four tons of coal. They put her in thorough repair, and gave her one hundred and fifty tons. On the arrival of the Connecticut at Havana, she found the ram Stoneall lying very quietly at anchor, and as she was the only man-of-war there then, she remained four days watching the Rebel pirate, until the Powhatan and the remainder of the fleet ordered to her blockade had made their appearance, when the Connecticut proceeded to Key West for coal. Captain Charles S. Boggs; Lieutenant, H. B. Tyson; Acting Master, Wm. H. Hobbs; Assistant Surgeon, C. T. Hubbard; Assistant Paymaster, L. G. Billings; Acting Ensigns, C. Carven, E. B. J. Singleton, John D. Haden, C. J. Goodwin; Engineers—Chief, H. D. Nones; Second Assistants, H. Holmes, H. Pilkington, E. F. Phillips, J. D. Graft; Acting Third Assistants, John Allen, L. S. Woodbury, Wm. Holland; Mates, E. P. Bieque, H. G. Thorburn, William Read, Gilbert H. Prindle.

DICTIONARY, Ocean Monitor, 2.—The success of this vessel is about to be finally tested. She will sail from this port during the week, proceeding by the outside route to Newport.

ESTRELLA, paddle wheel, 5, having been fitted out, is now the flagship of the West Gulf Squadron. She has the staff on board, and is now in Mobile Bay.

FORT HENRY, paddle wheel, 7, from St. George's Sound, Florida, East Gulf Blockading Squadron June 4, via Key West, arrived at New York June 16. The following is a list of her officers:—Acting Volunteer Lieutenant-Commanding, J. B. Baxter; Acting Master and Executive Officer, Theodore Werlof; Acting Assistant Surgeon, Ernest D. Martin; Acting Assistant Paymaster, H. L. Hopkins; Acting Ensigns, John Hancock, A. C. Fowler, James R. Harding; Engineers—Acting Second Assistant (in charge), Samuel Lemon; Acting Third Assistants, Claude Vautin, J. S. Bill, J. Knox Foster; Acting Mate, Herman G. Holmes. Acting En-

sign Schuyler Cobb, resigned, and Acting Mate S. W. Lewis, resigned, were passengers.

GALEA, iron-clad, 11, arrived at Portsmouth June 10.

HONEYUCKLE, screw, 2, arrived at New York on the 19th ult., from Tampa Bay, Florida. This vessel has been on blockade duty for the last two years, during which time she has captured seven prizes, and has co-operated in every movement with the Army forces at Cedar Keys, Florida.

HONSTVILLE, screw, 4, Acting Volunteer Lieutenant-Commander Edward F. Devens, arrived at New York June 25, from Aspinwall 16th. She brings as passengers Major-General Daniel E. Sickles and staff, and thirty of the crew of the steamer *Golden Rule*, lost at sea.

ICHLATA, screw, 14, Commander John J. Almy, sailed from Port Royal for the Brazilian Squadron on Thursday, June 15. The following list of officers for this vessel is published:—Captain, John J. Almy; Lieutenant-Commander, F. V. McNair; Lieutenant, C. M. Schoonmaker; Surgeon, Albert C. Gorgas, M. D.; Acting Assistant Paymaster, G. W. Moton; Acting Master, John B. Childs; Ensign, Charles McGregor; Acting Ensign, George M. McClure; Engineers—Acting Chief, Alexander McCauland; Acting First Assistant, Benjamin F. Beckett; Second Assistant, Levi T. Safford, William L. Bailie, Asaph Dunbar; Acting Third Assistant, A. Merritt Shaw, Benjamin F. Lewis, John E. Connor; Mates, Charles H. Chaso, E. D. Conover, George W. Marchant, George H. Prescott; Captain's Clerk, John W. McReynolds; Paymaster's Clerk, C. A. Spear; Boatswain, Edward E. Brady; Gunner, David A. Roe; Carpenter, John Mills; Surgeon's Steward, C. L. Cassia.

KANAWHA, screw, 4, from Galveston, via Pensacola, June 14, arrived at New York June 25, from blockade service. The *Kanawha* has been in commission nearly forty-seven months, and for the past seventeen months engaged in blockading Galveston and the coast of Texas. She has captured no less than twenty-five blockade-runners. Lieutenant-Commander, Bashrod B. Taylor; Acting Assistant Paymaster, W. Omond Jube; Acting Assistant Surgeon, Stephen S. Green; Acting Ensigns, John J. Mowle, Frederick H. Deering, Albert B. Hall, Charles S. Thurston; Acting Second Assistant Engineer, Richard Hall; Acting Third Assistant Engineers, Wm. D. Pancake, A. Higgins, Patrick H. Friel.

LADY STERLING, paddle-wheel, 8, a captured blockade runner, arrived at Washington June 15, from Newport.

MARATANZA, paddle-wheel, 6, arrived at the Portsmouth lower harbor on Sunday, June 11, and came up to the yard on Monday morning.

MOUNT VERNON, screw, 5, went out of commission at the Brooklyn Yard on the 24th of June. She will probably be sold.

MARSHALL, paddle-wheel, 10, arrived at New York June 18. Commander, R. T. Renshaw; Lieutenant, G. W. Sumner; Acting Masters, Henry Kane, Thomas Stothard, R. Rababan; Acting Ensign, Charles Wilson; Acting Assistant Surgeon, John R. Latson; Engineers—Acting First Assistant, Levi R. Green; Acting Third Assistants, William Sheehan, H. C. Keyser; Acting Gunner, W. B. Jarvis.

NARCISUS, screw, 2, has been raised, and is now in commission.

MONADOCK, double-turret Monitor, 4, after being in commission nine months, has returned to the Philadelphia Yard in as good condition as the day she sailed. Since she left Boston, she has steamed over six thousand miles alone (though having different war vessels along as convoys), and has been present at both attacks on Fort Fisher, besides aiding in the downfall of Charleston and Richmond, winding up her successful though short career by a visit to Havana. Commander, William Ronckendorff; Lieutenant and Executive Officer, La Rue P. Adams; Acting Masters, Mr. Miliken, S. H. Mead; Acting Ensigns, W. B. Mix, T. W. Swift, Jr., P. Davison; Assistant Surgeon, Daniel McMurtrie; Engineers—Acting Chief, J. Q. A. Ziegler; First Assistants, S. A. Randall, W. A. Phillips; Second Assistants, B. C. De Plaine, Baxter Smith; Acting Third Assistants, T. Wilde, R. Aldridge, John Brice, W. P. Whitmore; Gunner, P. Barrett.

NORWICH, screw, 6, arrived at Philadelphia on the 18th ult. This vessel has been on active duty since the commencement of the Rebellion, and has been North but once during that time. For three years past, she has been stationed on the St. John's River, Florida. In February, 1864, she convoyed the expedition under Major General Q. A. Gillmore, which occupied Jacksonville, twenty-five miles from the mouth of the St. John's River. The force numbered ten thousand, and were embarked on twenty-three steamers. She has also rendered great service to the Army in picketing creeks, etc. She now comes home to be put out of commission. Acting Master Commanding, W. H. De Wolf; Acting Ensigns, John H. Sincott, John P. Chadwick; Acting Assistant Paymaster, G. F. Gardiner; Acting Assistant Surgeon, J. A. Petrie; Mates, H. Sinclair, Wm. White; Engineers—Second Assistant, J. C. Cooper; Third Assistants, E. R. Wambling, W. H. Wambling.

OWASCO, screw, 4, left Galveston on the 11th ult. for Pensacola, to take on coal, and started for the Brooklyn or Philadelphia Navy Yards on the 18th.

OSPREY, screw, 13, from Pensacola on the 16th, arrived at Fortress Monroe June 24, and reported having spoken off the Florida coast the British brig *Ceylon*, and furnished her with water. The *Ceylon* was bound to New York. The *Osprey* also spoke in latitude 23 degree 36 minutes, the steamer *Venus*, bound to Texas.

PORT ROYAL, double ender, 8, which has been at New Orleans for the last five months, undergoing repairs, left for Galveston June 14.

PAMPERO, ship, 6, from Southwest Pass, arrived at New Orleans on the 12th ult. She is ordered to take on all the engineers' stores and carry them to Pensacola.

PAWNEE, screw, 4, Lieutenant William Whitehead commanding, anchored off the Washington Yard on June 22, having on board Rear-Admiral J. A. Dahlgren and staff, who were brought ashore in smaller boats.

R. R. CUTLER, screw, 12, Commander C. H. B. Caldwell, commanding, from Galveston June 9, via Pensacola 16th, has arrived at New York. The *Cutler* left Galveston as flagship of Admiral Tattnall, who transferred his flag to the U. S. steamer *Estrella* at Mobile Bay. Commander, C. H. B. Caldwell; Lieutenant, John J. Read; Acting Master, Edwin Babson; Acting Assistant Paymaster, A. Wright; Ensigns, A. T. Hamblin, Wm. L. Hatch, B. P. Clough; Engineers—Acting Chief, John D. Williamson; Acting First Assistant, D. S. King; Acting Second Assistants, James Pollard, T. V. Holt, Wm. Ross; Acting Third Assistants, David Gilliland, Isaac H. Fehr, Geo. F. Young, Edwin Cram; Acting Gunner, E. P. Palmer.

SEA FOAM, brig, 2, was sold by auction, at the Charlestown Yard, June 12. She was purchased by Mr. Deballar for \$10,000, which is considered a good bargain, as she is sound and in good condition.

SEAWAT, screw, 8, sailed from Brooklyn Yard June 27, under sealed orders. It is understood she will join the European Squadron. She was put in commission Monday. The following is a list of her officers:—

Lieutenant-Commander, J. J. Walker; Lieutenant, B. J. Cromwell; Acting Master, S. N. Myer; Acting Ensigns, O. A. Thompson, W. Burnbridgehoff; Passed Assistant Surgeon, D. R. Bannon; Acting Paymaster, J. O. Graves; Mates, George W. Pratt, J. S. O'Brien; Acting Ensign, George W. Coffin; First Assistant Engineer, R. S. Talbot; Second Assistant Engineers, A. J. Montgomery, I. M. Emanuel, John Lowe, James W. Hotchin.

SEARS AND STRIPES, screw, 5, arrived June 24, at Philadelphia. Has been in commission three years. Since October 8, 1862, she has been on blockade duty in the East Gulf. At Key West she left the frigate *Poucharan*, of Admiral Stribling, also, sloop *Dale*, and ship *Ino*, the two latter to sail North shortly. Acting Volunteer Lieutenant-Commander, John Sherrill; Acting Master and Executive Officer, H. Welton; Acting Assistant Paymaster, James Winter; Acting Assistant Surgeon, G. S. Parker; Acting Ensigns, J. D. Babcock, Wm. A. Abbott; Acting Second Assistant Engineer, James Ogden; Acting Third Assistant Engineers, E. L. Heller, Wm. H. Dewing, Geo. Westinghouse, Jr., Thos. Clark.

SEMINOLE, screw, 8, built at Pensacola in 1860, now blockading off Galveston, claims the honor of destroying, on the 25th, the famous blockade-runner *Denbigh*, loaded with an assorted cargo from Havana. This was accorded in our last to the *Cornubia*. One of her men was accidentally killed by the discharge of his own musket while leaving the steamer after she had been fired. The *Seminole* had, on the 1st of April, nearly destroyed the blockade-runner *For*, but owing to the shallow water, could not finish the work. The *Seminole* took part in the capture of the forts in Mobile Bay on the 6th of August, and after the fall of Fort Morgan, was sent to the blockade off Galveston, where she has since remained. Commander, Albert G. Clary; Lieutenant and Executive Officer, George Munday; Acting Master, Albert Cook; Paymaster, Levi S. Stockwell; Passed Assistant Surgeon, Edward M. Stein; Chief Engineer, A. R. Calden; Acting Ensigns, F. Kempton, Walter S. Church, David K. Perkins, John A. Bennett; Assistant Engineers, George Ellis, P. I. Hughes, Wm. Drinkwater, H. W. Whiting.

SOMERSET, paddle-wheel, 7, arrived at this port yesterday, in tow of the United States steamer *Isonomia*, from West Pass, St. George's Sound, Florida, which place she left on the 4th ultimo; has been in commission since April, 1862, and has been attached to the East Gulf Squadron, upon blockading duty. She has captured several valuable prizes, one of which was the *Circassian*, taken off Cuba. Left at West Pass the *Muscicola*, *Paul Jones*, and *Itasca*. Officers and crews all well. Arrived at Key West on the 8th, and left on the 9th ultimo. No sickness at the latter port. The *Poucharan* was still off the town, flying the Admiral's pennant. The other vessels there were the *Mahaska*, *Stars and Stripes*, *Honduras*, *Sunflower*, *Houqua*—the two latter coaling, preparatory to sailing for the North. Several of the officers of the *Somerset* and many of her crew were detached previous to leaving. Acting Volunteer Lieutenant, W. P. Rogers; Executive Officer, H. R. Baker; Acting Assistant Surgeon, George P. Wright; Acting Assistant Paymaster, Edwin Webster; Engineer (in charge), P. V. Stillings; Acting Ensigns, John Germain, Edward R. Smith; Acting Mate, Alonzo Rivers.

TALLAHATCHIE, paddle wheel, 5.—Fleet Surgeon Jas. C. Palmer has fitted the *Tallahatchie* out as a hospital ship for the West Gulf Squadron, and she is at present undergoing repairs at Mobile.

VALLEY CITY, screw, 8, arrived at New York June 20, from Hatteras Inlet. She went into commission in September, 1861, and was stationed in the Potomac until the fitting out of the Burnside expedition, which she joined, and, during the intervening three years, has rendered good service.

WISSAHICKON, screw, 4, sailed from Charleston, S. C., on the 15th ult., and arrived in the harbor of New York June 20. This vessel was built at Philadelphia in 1861, by Mr. John W. Lynn, and since then she has been constantly in service, in the Gulf Squadron, under Vice-Admiral Farragut, and, for the last two years, under Rear-Admiral J. A. Dahlgren, commanding South Atlantic Blockading Squadron. She has participated in several engagements on both these stations, and acquitted herself with credit. The U. S. steamer *Philadelphia*, flagship *Pawnee*, *Conemaugh*, *Emma*, Monitor *Katskill*, U. S. steamer *John Adams*, several Navy tugs, and schooners *Blunt* and *Hope*—the latter vessels engaged in wrecking operations in the lower harbor, under the superintendence of Acting Volunteer Lieutenant Wm. L. Churchill, the efficient Chief of the Corps of Naval Divers, established by Rear-Admiral Dahlgren, and the first organization of the kind in the United States Navy. It was expected the *Pawnee* would leave shortly for the North, with the Admiral and his staff on board. The health of Charleston is reported to be good. Lieutenant-Commander, A. W. Johnson; Acting Ensigns, Chas. F. Dearing, Henry F. Dorton, Alonzo Ellwell; Acting Assistant Surgeon, John N. Connan; Acting Assistant Paymaster, Charles Dutcher; Acting First Assistant Engineer, Joseph McKnight; Third Assistant Engineer, George Paul; Acting Third Assistant Engineers, Charles E. Jevons, Joseph F. Miller, William Barclay; Joseph Gregory, Jr.

VARIOUS NAVAL MATTERS.

Over one hundred volunteer naval officers have resigned during the month; their resignations have been duly accepted.

U. S. STEAMERS *Pampero* and *Thetis* were in the Mississippi 10th inst., bound up to New Orleans.

The steam launch, commanded by Mate Jacob Hemp, was lost in a gale in Fripp's Inlet, on Monday, while on the passage from Charleston to Port Royal.

Under the instructions of the Navy Department, League Island was visited last week for the purpose of preparing it for the iron-clads, which are all to be laid up. At the same time a number of Monitors arrived from the North Atlantic Squadron, and anchored in the stream off the city of Philadelphia.

The following vessels left the Brooklyn Yard on the 28d, to take their station at Red Hook, near the long pier that runs into Gowanus Bay:—*Kensington*, *Nereus*, *Proteus*, *Flag*, *Vicksburg*. Other condemned vessels will be added to this fleet, and be sold at the earliest convenient moment.

Last week the following vessels left the South Atlantic Squadron for Philadelphia and other Northern ports:—*Nantucket*, *Mingo*, *Supply*, *Norwich*, *Dan Smith*, *Sarah Bruen*, *G. P. Williams*, *Wamsutta*, and *Wissahickon*. The *Nahant*, *Astoria*, *T. A. Ward*, *Norfolk Packet*, *Fara*, *Geranium*, *Iris*, *Camelia*, *Sweet Briar*, *Dandelion*, *Larkspur*, *Carnation*, and several tugs are preparing to follow them.

The commandant of the Brooklyn Yard has issued the following order to correct a serious evil:—"As numerous desertions have recently taken place by the want of judgment on the part of certain officers in granting liberty, it is hereby directed that in future no enlisted man, including marines, are to be permitted to go on shore without the consent of the commandant of the station."

The iron ram of the Rebel steamer *Mississippi*, burned at the taking of New Orleans, by Admiral Farragut, in 1862, is now lying on Lyceum avenue, Brooklyn Navy Yard. It is almost five feet high, with two flanges bolting on the bow about ten feet long, and a blade projecting three feet, running out very sharp.

The iron-clad *Canonicus*, Lieutenant-Commander George E. Bolknep, and the steamers *Wando*, Acting Master King, and *Fah Kee*, which were recently detached from the South Atlantic Squadron and sent to Havana, have returned to Port Royal, and will proceed North as soon as they can be prepared for the trip. The *Canonicus* fired the last shot fired from any naval vessel at the fortifications of Charleston, and received the last shot which was fired from those fortifications.

The following is published as Rear-Admiral Dahlgren's staff which during two years, has undergone many changes:—Fleet Captain, Joseph M. Bradford; Flag Lieutenant-Commander, E. O. Matthews; Flag Lieutenant, James O'Kane; Fleet Surgeon, William Johnson; Fleet Paymaster, James H. Watmough; Fleet Judge-Advocate, Charles Cowley; Fleet Engineer, Robert Danby; Fleet Pilot, William Haffards; Admiral's Secretary, H. L. Peterson; Aides, E. J. Diehman, Walter Cooper; Signal Officer, George Rixford.

The following vessels were sold on Tuesday, June 20, at the Philadelphia Navy Yard for the sums placed opposite each name:

Steamer <i>Ladona</i> (English built, iron hull, prize).....	\$35,200
Steam tug <i>Acacia</i>	1,400
Steamer <i>Cambridge</i>	17,500
Tug <i>E. B. Hales</i>	4,600
Steamer <i>Quaker City</i>	35,000

A LARGE number of the workmen employed in the Philadelphia Navy Yard are now being discharged. The only vessels on the stocks are the double-turreted Monitor *Shackamaxon*, frigate *Neshamony*, and a gunboat, the keel of which is not yet finished. At the Brooklyn there are still about 5,000 men at work. Five vessels are on the stocks, one of them—the *Madawaska*—expecting to be launched July 8th. Several buildings for ships, storehouses, &c., are going up, and the working facilities of the yard are constantly enlarging.

Surgeons George Clymer, William Maxwell Wood and Francis M. Grinnell have made an inspection of the grounds and buildings of the Academy at Annapolis, and report certain repairs, in order to render the Academy safe from any contagion to be feared from its former use as an hospital. The work of cleansing and repairing has been begun, and the Academy will be ready for use in October next. Acting Volunteer Lieutenant W. W. Crowinshield has been ordered to duty in charge of repairs.

ALL the midshipmen at the Newport Naval Academy have embarked on board the practice squadron, and expected to sail Thursday, June 22. The students, 395 in number, will man the fleet, consisting of the following vessels:—Sailing vessels *Macedonian*, sloop of the second class; *Marion*, sloop of the fourth class; side-wheel steamer *Winnipeg*, double-end, and screw steamer *Marblehead*, fourth class. Paddle-wheel steamer *Mercury*, formerly of the Potomac Flotilla, has been ordered to Newport. She will probably be employed in towing the middy practice squadron and otherwise making herself useful to the Naval Academy. The fleet rendezvous at Gardner's Bay, on the east end of Long Island, and will cruise along the Atlantic coast, not entering European waters, as has been expected. All the personal effects of the midshipmen are packed up ready for transmission to Annapolis, which will be at an early day. Commander D. M. Fairfax commands the squadron.

A CIRCULAR has been issued by Admiral Bell, commandant of the Brooklyn Yard, as follows:—"By a recent resolution of Congress entitled 'A resolution to encourage the employment of disabled and discharged soldiers,' an order has been issued by the Navy Department to the effect that in the employment of mechanics and others in navy yards or stations, preference be given to such as have been honorably discharged from the Navy and Marine corps, and especially to those who have been wounded or disabled in their country's cause, provided they are capable of performing the duties required of them. In compliance with the above resolution of Congress and instructions from the Navy Department, it is enjoined on the master-workmen in this yard, when selections are made, to give the preference in all cases whatever to persons of this description; and, if found wanting in the slightest degree, to recommend their discharge, and nominate in their places men from the class above referred to."

The Philadelphia *Inquirer's* correspondent at Fortress Monroe states that the U. S. steamer *Arkansas*, which arrived there June 16, fell in with a ship exhibiting signals of distress on Hatteras Shoals. The writer says:—"Boarding her, Captain Kirby found her in charge of Sailing Master Greenwood, and three seamen from the United States transport steamer *Andrew Fletcher*. The *Fletcher* had discovered the *Empire* on the 13th instant, 60 miles south of where Captain Kirby boarded her. When first boarded she had seven feet of water in her hold. The water had not gained any since. No papers of any description were found on board, and her destination, or port from whence she last sailed, could not be ascertained. There is half a cargo of sugar on board, but very little of which is injured by water. Captain Kirby placed five of his sailors on board, and expects the ship in the Roads this evening. He supposes her to be the *Empire*, of New York, formerly employed as a Liverpool packet. On her stern is painted 'Empire, of Liverpool.' No colors, English or American, were found on board the abandoned ship. The ship with her cargo will net a handsome sum to her lucky salvors."

The Navy Department has received from Commander W. E. Fitzhugh, his report concerning the surrender of the Rebel naval forces on Red River. Commander Fitzhugh, in his dispatch, which is dated on board the *Ouzachita*, at Alexandria, Louisiana, June 3d, says that he started up Red River on the 28th of May, with the steamers *Benton*, *Ouzachita*, *Fort Hindman*, and the tug *Fern*, in company with Major-General Herron and his steamer *Ida May*, in advance of the troops. He encountered no resistance whatever. All whom he met seemed well disposed. On the morning of June 3 the squadron met Lieutenant-Commander J. H. Carter, commanding Rebel naval forces of the trans-Mississippi squadron and received from him the iron-clad *Missouri* and the paroles of himself, officers and men. Lieutenant-Commander Carter informed Commander Fitzhugh that the *Missouri* is the only naval vessel on Red River or its tributaries. The *Champion*, one of the pump boats captured in the late expedition, was turned over to the army. The *Missouri* has been brought below the Falls, and is to be refitted at the mouth of the river. She was designed to be quite a formidable vessel, made on the plan of the *Tennessee*, but was built of timber not thoroughly seasoned and caulked with cotton. and it may, therefore, well be believed that she leaks badly. Her battery is composed of one 11-inch gun, one 9-inch and two heavy 33-pounders. Commander Fitzhugh has gone up to Shreveport to secure such property as may belong to the Navy. The number of naval prisoners paroled by him at Alexandria was eighteen men, and six officers, including Lieutenant-Commander J. H. Carter.

Those possessed of valuables which they wish to have preserved against the possibility of loss, should leave them with the Safe Deposit Company, an institution which has been recently formed in New York for the purpose of taking charge of every variety of articles of small bulk, papers, stock and other securities, gold, silver and plate, &c. The Company has a large number of small fire-proof safes in the burglar-proof vaults of the fire-proof building where their offices are situated, at No. 146 Broadway. They have ample capital, and are able to insure against loss when desired, while the high personal character of the officers of the Company, and the admirable system with which its affairs are conducted, give every possible guarantee as to the good faith with which its business is transacted. Mr. F. H. JENKS, the President of the Company, is a gentleman of high personal character, whose name is alone sufficient guarantee for the stability of the institution.

The forthcoming Report of the Committee on the Conduct of the War will be published in three large volumes, instead of four as was originally contemplated.

OBITUARY.

COLONEL G. J. CAMPBELL.

COLONEL CLAYTON J. CAMPBELL, of the Twenty-third United States Colored Troops, died at Castleton, N. Y., on the 13th of June.

Born in July, 1838, he died "young in years though old in fame," and his brilliant record is not often equalled. A graduate of the Free Academy, Union College, and the University of Gottingen, he was a finished scholar and a courteous and accomplished gentleman. Successively a private in the Forty-fourth New York Volunteers, a lieutenant on the staff of General Palmer, adjutant of the One Hundred and Fifty-second New York, captain in Upton's One Hundred and Twenty-first New York, he finally passed a most brilliant examination and was commissioned lieutenant-colonel and afterward colonel of the Twenty-third United States Colored Troops. This gallant regiment he led into the hottest of the fight at Petersburg when the mine exploded, and left in and around that awful crater nearly four hundred of his men. He was borne off the field with a lung contused and ruptured by a bursting shell, the primal cause of a long weakness, and at last of death.

DIED, on the 10th inst., at his home near Boston, of camp fever, HUNTINGTON PROTHINGHAM WOLCOTT, Second Lieutenant Second Massachusetts cavalry and A. D. C., aged 19, eldest son of J. HUNTINGTON WOLCOTT, and great grandson of OLIVER WOLCOTT, one of the Signers of the Declaration of Independence.

Among the thousands who have fallen in battle or by disease during this war, no one has laid down a purer life with nobler devotion than the young officer whose death is here recorded. Possessed of all that renders life desirable, with every inducement to ease and indulgence in the pleasures of youth, a simple sense of duty caused him to take part in the great struggle for his country. Under all the temptations of Army life, he retained unsoiled the purity of his character. His gentleness won the affection of his fellow-soldiers, as his courage did their respect. Having participated with honor in the glories of SUMMER'S last campaign, he accompanied the triumphant return of the Army, escaping the dangers of the field, only, alas! to die from disease contracted while in the service. G.

[Special Notice]

Do not waste your money buying any of the numerous worthless articles called GOLD PENS, which have flooded the market for the last few years, when at lower prices you can get pens which are acknowledged to be the best in the world.

Avoid the shameless upstarts, whose lack of brains compels them to attempt imitation, even to the advertisement. If you want the full value of your money, call on A. MORTON, No. 25 Maiden Lane, or enclose stamp for circular.

MARRIED.

[Announcements of marriages should be paid for at the rate of \$1/2 cents each.]

McCook-Thompson.—In Peoria, Ill., June 20, at the residence of W. R. Phelps, Esq., by the Right Rev. Henry J. Whitehouse, Bishop of the Diocese, assisted by Rev. Mr. Roberts, rector of St. Paul's church, Major-General EDWARD M. McCook to Miss MARY THOMPSON, of the above place.

PERRY-SMITH.—At St. James' church, New London, Ct., June 12, by Rev. Dr. Hallen, Mr. EDWIN A. PERRY, of New York, formerly of Springfield, Mass., to Mrs. SARAH S. SMITH, youngest daughter of Commodore George W. Rodgers, U. S. N.

MERRILL-LINSLEY.—At Washington, D. C., May 23, by Rev. H. A. Raybold, Surgeon CHARLES G. L. MERRILL, Twenty-second United States Colored Troops, to Miss GEORGIA A., eldest daughter of Charles Linsley, Esq., of New Haven, Conn.

STEARNS-BRAMHALL.—In Boston, Mass., June 27, by Rev. Dr. E. C. Gannett, Lieutenant JAMES P. STEARNS, Veteran Reserve Corps, to Miss LIZZIE S., daughter of William Bramhall, Esq., of Boston.

FAYVILLE-WHARTON.—In Dorchester, Mass., June 25, Mr. JAMES H. FAYVILLE to Miss SUSAN WHARTON, daughter of Lieutenant-Colonel D. P. Whitney, U. S. A. No cards.

DIED.

KURTZ.—In Georgetown, D. C., June 13, Mrs. JANE T. wife of Major John D. Kurtz, of the Engineer Corps, U. S. Army, in the 44th year of her age.

JOHNSON.—At Newport, R. I., on board U. S. ship Constitution, June 24, EDNA, wife of Lieutenant-Commander P. C. Johnson, and daughter of George Wansley, Esq.

PROPOSALS FOR MATERIALS FOR THE NAVY.

NAVY DEPARTMENT, BUREAU OF EQUIPMENT AND RECRUITING, June 24, 1865.

Sealed proposals to furnish materials for the Navy for the fiscal year ending 30th June, 1866, will be received at the Bureau of Equipment and Recruiting until 10 o'clock A. M. of the 26th day of July next, at which time the opening will be commenced.

The materials and articles embraced in the classes named are particularly described in the printed schedules, any of which will be furnished to such persons as desire to offer, on application to the Commandants of the respective Navy Yards, and those of all the yards upon application to the Bureau.

Bidders are referred to the Commandants of the respective yards for samples, instructions, or particular description of the articles; also, for blank forms of offer and guaranty.

The classes of this Bureau are number and designated as follows:—

- | | |
|--------------------------------|------------------------------------|
| No. 1. Flax, Canvas and Twine. | No. 15. Sheet Iron. |
| 2. Cotton, Canvas & Twine. | 16. Soap and Tallow. |
| 3. Iron, &c. | 17. Brushes. |
| 4. Tin, Zinc, &c. | 18. Stationery. |
| 5. Spermin Oil. | 19. Hardware. |
| 6. Cooking Utensils. | 20. Ship Chandlery. |
| 7. Leather, &c. | 21. Copper Wire. |
| 8. Hose. | 22. Firewood. |
| 9. Lignumvitae. | 23. Whale, Neatafoot, and Tar Oil. |
| 10. Lanterns & Lamps. | 24. Chain Iron. |
| 11. Ox Hides for Rope. | 25. Coal. |
| | 26. Sheet Copper. |

The following are the classes, by their numbers required at the respective Navy Yards:—

KITTERY.

Nos. 1, 2, 3, 5, 10, 18, 22, 24.

CHARLESTOWN.

Nos. 1, 2, 3, 5, 7, 10, 11, 14, 15, 18, 20, 22, 24, 25, 29, 31.

BROOKLYN.

Nos. 1, 2, 3, 4, 5, 7, 10, 11, 13, 18, 20, 22, 24, 29, 31, 35.

PHILADELPHIA.

Nos. 1, 2, 3, 4, 5, 7, 10, 11, 12, 20, 22, 24, 29, 31, 40.

WASHINGTON.

Nos. 1, 2, 3, 4, 5, 11, 12, 18, 22, 24, 29, 34.

NORFOLK.

Nos. 1, 2, 5, 7, 10, 11, 13, 18, 20, 22, 24, 25, 29, 31.

BARNUM'S AMERICAN MUSEUM.

Always cool and delightful. Grand Holiday Week. The most attractive novelties ever offered. TWO LIVING WHITE WHALES, brought to this city from the coast of Labrador, at an expense of \$9,000, are now depositing in the Mammoth Whale Tank.

Afternoon at 3, Evening at 7½.—The model emotional drama of the age, EUSTACHE BAUDIN; or, THE PRIDE OF BIRTH. The Great American ONE-LEGGED DANCER, TONY DENIER. W. B. HARRISON, Comic and Extremeposeur Singer.

Morning at 11.—PAUL COSPORSER, Philosopher and Magician, will appear in his Necromantic Illusions.

A LIVING ALLIGATOR, 20 feet long. A HORSE AND RIDER ENTWINED BY AN ENORMOUS SERPENT, CONVERTED INTO STONE. Prof. Hutchings, Lightning Calculator. Woodroffe's Bohemian Glass Blowers—Two Glass Steam Engines in motion. Fifty Life-size Moving Wax Figures. Jeff Davis in Petticoats. A portion of the Charter Oak of Connecticut. Seventh District Draft Wheel. Fat Woman, Glanceless, Circassian Girl, Living Otters, Grand Aquaria, a million curiosities.

Admission, 30 cents; children under ten, 15 cents.

JULY 4.—Performances nearly every hour—day and evening.

CRINOLINE FOR 1865.

DUPLIX ELLIPTIC (or Double Spring) SKIRT.

J. W. BRADLEY'S NEW PATENT DUPLIX ELLIPTIC SKIRT.

The most Elastic, Durable and Elegant. The Strongest and still the Lightest and most Stylish as well as the most Comfortable and Economical Hoop Skirt ever made.

For sale by Arnold, Constable & Co., Lord & Taylor, and all first-class stores in this city and through out the United States.

Manufactured solely by WEST'S, BRADLEY & CARY, Office 97 Chambers-st., New York.

THE DERINGER PISTOL.

TIFFANY & CO., 550 AND 562 BROADWAY, NEW YORK.

SOLE AGENTS FOR NEW YORK AND THE EASTERN STATES.

By a recent arrangement with Mr. DERINGER, the subscribers have undertaken the exclusive agency for New York and New England, of the well-known pocket arm of which he is the inventor and only manufacturer. They propose keeping constantly in store a full assortment, comprising all sizes and finishes of this unique pistol, and will be at all times able to fill Trade Orders with promptness, at manufacturers' prices. The arrangement has become necessary on the part of Mr. Deringer, in order to protect the public from spurious articles assuming to be his wares, and that purchaser only, wholesale or retail will be safe who appreciates this fact.

TIFFANY & CO.

LEFFERTS, HOFFMAN & CO., No. 40 PARK ROW, (TIME BUILDING), NEW YORK.

Military & Naval Bankers & Collectors; Bureau of Army and Navy Information. Officers' pay rolls, soldiers' pay, pensioners' pay, State and United States bounties collected.

Clearances for officers obtained, &c.

NEW COLLECTION OF BEAUTIFUL PIANO-FORTE MUSIC. EVERY PIANIST SHOULD HAVE A COPY.—GEMS OF GERMAN SONG. Comprising the most beautiful Vocal Compositions of Beethoven, Von Weber, Mendelssohn, Abt, Schubert, Kucken, Gumbert, Reichardt, Krebs, Spohr, Proch, Keller, and others. Just published. Price, plain, \$2.50. Cloth, \$3. Full Gilt, \$4. Sent post-paid. OLIVER DITSON & CO., Publishers, 277 Washington street, Boston.

GREAT CENTRAL ROUTE TO THE WEST.

Through tickets to DETROIT, CHICAGO AND MILWAUKEE, and all points in the West, Northwest and Southwest, with accurate information and maps of the route, may be obtained at the General Office, 273 Broadway, New York.

GEORGE E. JARVIS.

PROPOSALS FOR TIMBER AND MATERIALS FOR THE NAVY.

NAVY DEPARTMENT, BUREAU OF CONSTRUCTION AND REPAIR, June 15, 1865.

Sealed proposals to furnish Timber and Materials for the Navy, for the fiscal year ending June 30, 1866, will be received at the Bureau of Construction and Repair, until 10 o'clock A. M. of the 17th day of July next, at which time the opening will be commenced.

Proposals must be endorsed "Proposals for Timber and Materials for the Navy," that they may be distinguished from other business letters, and directed to the Chief of the Bureau of Construction and Repair.

The materials and articles embraced in the classes named are particularly described in the printed schedules, any of which will be furnished to such persons as desire to offer, on application to the Commandants of the respective yards or to the Navy Agent nearest thereto, and those of all the yards upon application to the Bureau.

The Commandant of each Navy Yard will inform bidders of the quantities of each article, where the sizes are variable.

This division into classes being for the convenience of dealers in each, such classes only will be furnished as are actually required for bids. The Commandant and Navy Agent for each station will, in addition to the schedule of classes of their own yards, have a copy of the schedules of the other yards for examination only, from which may be judged whether it will be desirable to make application for any of the classes of those yards. All other things being equal, preference will be given to articles of American manufacture.

Offers must be made for the whole of the class at any yard, upon one of the printed schedules, or in strict conformity therewith, or they will not be considered.

Upon application to the Bureau; to the Commandant of any yard, or to any Navy Agent, the form of offer, of guarantee, and other necessary information respecting the proposals, will be furnished.

The contract will be awarded to the lowest bidder who gives proper guarantees, as required by the law of August 10, 1846, the Navy Department reserving the right to reject the lowest bid, or any which may be deemed exorbitant.

The contracts will bear date the day the notification is given, and deliveries can be made from that date.

Sureties in the full amount will be required to sign the contract, and their responsibility certified to by a United States District Judge, United States District Attorney, Collector, or Navy Agent. As additional security, twenty per centum will be withheld from the amount of the bills until the contracts shall have been completed, and eighty per centum of each bill, approved in triplicate by the commandant of the respective yards, will be paid by the Navy Agents at the points of delivery, in funds or certificates, at the option of the Government, within ten days after the warrant for the same shall have been passed by the Secretary of the Treasury.

The classes of this Bureau are numbered and designated as follows:—

- | | |
|--------------------------------------|----------------------------------|
| No. 1. White oak logs. | No. 22. Mahogany. |
| 2. White oak keel or keels' piece. | 23. Lignumvitae. |
| 3. White oak curved timber. | 24. Iron—round, flat and square. |
| 4. White oak plank. | 25. Steel. |
| 5. White oak boards. | 26. Iron spikes. |

FIRST NATIONAL BANK OF PHILADELPHIA,

FINANCIAL AGENT OF THE UNITED STATES.

UNITED STATES 7-10 TREASURY NOTES, NEW PATRIOTIC LOAN.

Under instructions from the Treasury Department, this Bank is prepared to receive subscriptions to the new Patriotic Loan, issued in the form of Three Year Treasury Notes, bearing interest at the rate of 7-10 per cent. per annum, payable semi-annually in Lawful Money on the 15th days of February and August, respectively, of each year. These Treasury Notes are convertible at maturity, at the option of the holder, into U. S. 6 per cent. Bonds, interest payable in COIN, and redeemable after five and payable twenty years from August 15, 1897.

Coupon Notes will be issued in blank or payable to order as may be directed by the subscriber, in sums of \$50, \$100, \$500, \$1000 and \$5000.

Interest will be allowed from the date of the subscription to the 15th of August next, the date of the Treasury Note. Those who may subscribe after the 15th of August next, will be required to pay the accrued interest on the Notes.

C. H. CLARK, President.

THE COMPANY'S LANDS.

The lands of this Company consist of four (4) tracts, each selected with great care.

No. 1. Half acre in fee simple, on the McClintock Farm, eight rods from Oil Creek, Venango County, Pa.

No. 2. Two-thirds acre—ninety-nine years lease—on Buchanan Farm, ten rods front on Oil Creek.

No. 3. Two-thirds acre—ninety-nine years lease—on Buchanan Farm, ten rods from Oil Creek.

No. 4. One hundred and eighty acres—15 years lease—in the famous Federal Creek Oil country, Athens County, Ohio.

No. 1 is in the immediate vicinity of the noted Cuba Well, and of several other celebrated wells.

Near Lots No. 2 and 3 are the old Shaft Well, Hammond Well, and many more flowing and pumping wells. A 75 Barrel pumping well has been struck near these lots since February 1. They are also near the mouth of Cherry Run. No finer territory for producing oil exists, than that all around these three Lots. Every inch of each Lot is boring territory of the best quality.

No. 4 is in the heart of territory that is rapidly becoming known as the choicest of Oil Lands, and bids fair, of itself, soon to be worth in market, more than the entire Capital Stock of this Company. A well producing 100 barrels per day has been struck near this Lot recently.

PROSPECTS OF THE COMPANY.

All the necessary requisites for the rapid development of the lands of the Company are already procured, and on Lot No. 3 a well is down about three hundred feet, with a good prospect of a No. 1 well.

The working capital is in Cash, hence work will proceed and wells be completed without delay.

The Directors feel gratified that they have succeeded in securing, as Superintendent, Prof. L. Sternberg, for many years Principal of Hartwich Seminary, New York, a gentleman well qualified, by his energy and scientific attainments, for the position.

TO THE ARMY.

This Company is peculiarly the "Army Oil Company." Its Vice-President is Colonel W. D. Mann, long an Army officer. Its Secretary, Dr. Stratton, formerly a Captain in the Army. Three of its Directors are, Captain H. Douglass, of the 18th Infantry, now Chief Mustering and Disbursing Officer for Ohio, with office at Columbus; Dr. G. M. Sternberg, now in charge of U. S. Military Hospital at Cleveland, O.; and Dr. C. Mackenzie, now of same Hospital. The Stock of the Company is mostly in hands of Army officers. No better opportunity for safe and profitable investments can be found by members of the Army than this Company offers.

Any communication from the Army, to either of the above-named Army officers, will be cheerfully answered, and any desired information furnished.

SALE OF STOCK.

As the lands of this Company are oil lands, and worth in the aggregate more than the entire Capital Stock, at its par value, only \$10,000 of Stock will be sold, and that only at par.

Stock can be purchased at Principal Office, in Cleveland; at the New York Agency; of the Superintendent; or by addressing either of the Directors.

Officers or soldiers in the field who wish to purchase stock in this Company can send Treasury Notes, Drafts or Paymaster's Checks, by mail to Colonel W. D. MANN, 240 Broadway, New York, or to D. STRATTON, Cleveland, O., on receipt of which certificates of stock will be forwarded to their friends at home or to themselves in the field, as may be directed.

* Copies of any of the above works sent free on receipt of price. Catalogues forwarded on application.

TOMES, MELVAIN & CO.,

No. 6 MAIDEN LANE, NEW YORK.

Dealers in everything necessary for the Uniform of the ARMY AND NAVY—Swords, Sabres, Belts, Shoulder-straps, Epulettes, Laces, Buttons, Fatigue caps, &c., &c.; also a large and complete assortment of Firearms, Cutlery, Double and Single-bbl. Shot Guns, and Sporting Ammunition in every variety. Sole agents for Heiffer's celebrated Army Razors, Westley Richards' Fowling Pieces and Rifles, Kley's Percussion Caps for revolvers, &c.—Publishers of the "Uniform of U. S. Navy."

A FEW REASONS WHY THE AMERICAN WATCH IS THE BEST.

It is made on the best principle, while the foreign watch is generally made on no principle at all. The foreign watch is mostly made by women and boys, BY HAND. While their labor is cheap, their work is dear at any price. Such watches are made without plan, and sold without guarantee. They are irregular in construction, and quite as irregular in movement. They are designed only to sell, and the buyer is the party most thoroughly sold. Those who have kept "aneros," "leptines" and "Swiss levers" in professed repair for a few years will appreciate the truth of our statement.

THE PLAN OF THE AMERICAN WATCH.
Instead of being made of several hundred little pieces, screwed together, the body of the American Watch is formed of SOLID PLATES. No jar interferes with the harmony of its working, and no sudden shock can throw its machinery out of gear. In riding or any business pursuit, it is all held together as firmly as a single piece of metal. It is just what all machinery be—

1st. ACCURATE. 2d. SIMPLE. 3d. STRONG. 4th. ECONOMICAL.

We not only secure CHEAPNESS by our system, but QUALITY. We do not pretend that our Watch can be bought for less money than the foreign make-believes, but that for its real value it is sold for one-half the price.

OUR SOLDIER'S WATCH (named Wm. Ellery) is what its name indicates—Solid, Substantial and always Reliable—warranted to stand any amount of Marching, Riding or Fighting.

OUR NEXT HIGHER QUALITY OF WATCH (named F. S. Bartlett) is similar in size and general appearance, but has more jewels, and a more elaborate finish.

OUR LADIES' WATCH, recently brought out, is put up in a great variety of patterns, many of them of rare beauty and workmanship, is quite small, but warranted to keep time.

OUR YOUNG GENTLEMAN'S WATCH is neat, not large, and just the thing for the pocket of Young America.

THE PROOF of the merits of our Watch may be found in the fact that we now employ over seven hundred workmen in our factories, and that we are still unable to supply the constantly increasing demand.

OUR THREE-QUARTER PLATE WATCH is thinner and lighter than the others we have described. Its fine chronometer balance is delicately adjusted to correct the variation caused by changes of temperature. These watches are the fruits of the latest experiments in chronometry, and are made by our best workmen, in a separate department of our factory. For the finest time-keeping qualities they challenge comparison with the best works of the most famous English and Swiss makers.

ROBBINS & APPLETON,
Agents for the American Watch Co.,
182 Broadway, New York.

E. & H. T. ANTHONY & CO.,
Manufacturers of Photographic Materials,
501 BROADWAY, N. Y.
